Item 16: Matters Not Required to be Submitted

There are no matters to be taken up in the meeting that will not require the vote of the stockholders as of the record date.

Item 17: Amendment of Charter, By-Laws or Other Documents

There is no proposal to amend the Charter, By-Laws or other documents that needs to be submitted to the stockholders for approval.

Item 18: Other Proposed Action

No other proposed action to be taken up in the annual meeting other than those stated in the agenda.

Item 19: Voting Procedures:

Voting upon all questions at all meetings of the stockholders shall be made by shares of stock and not per capita or otherwise, each share of stock being counted as one vote.

Registrant's shares of stock entitle the holders thereof to one vote at any stockholders' meeting. Stockholders are given cumulative voting rights for the election of trustees.

All other matters to be decided shall require the affirmative vote of the majority of the corporation's shares present, or represented and entitled to vote at the Annual Meeting. Likewise, Trustees shall be elected with a majority vote of the shares present or represented.

With respect to the election of nine (9) trustees, each shareholder may vote such number of shares for as many as nine persons he may choose to be elected from the list of nominees, or he may cumulate said shares and give one candidate as many votes as the number of his shares multiplied by nine shall equal, or he may distribute them on the same principle among as many candidates as he shall see fit, provided that the total number of votes cast by him shall not exceed the number of shares owned by him multiplied by nine.

Using cumulative voting, the formula for finding the total number of votes needed for one seat in the Board is:

$$x = \frac{A \times B}{C + 1}$$

where	A	=	total number of shares voting
	B	=	number of Directors desired to be elected
	C	=	number of Directors to be elected

For this year's Annual Stockholders' Meeting, the Board of Trustees approved a resolution allowing stockholders to participate via remote communication and to vote in absentia. Stockholder's as of Record Date who have successfully registered their intention to participate in annual meeting via remote communication and to vote in absentia, duly verified and validated by the Corporation, shall be provided with unique log-in credentials to securely access the voting portal.

Stockholders and proxy holders can then cast their votes on specific matter for approval, including the election of directors. Votes will then be automatically tabulated and counted at the close of voting for each agenda item during the meeting.

Method by Which Votes Will be Counted

All matters subject to vote, except in cases where the law provides otherwise, shall be decided by the plurality vote of stockholders present in person or by proxy and entitled to vote thereat, a quorum being present.

The Corporate Secretary is the officer authorized to count the votes to be cast in the forthcoming annual stockholders' meeting.

Pursuant to the Corporation's By-laws, duly accomplished proxy forms must be submitted to the Corporate Secretary at least twenty-four (24) hours before the day of the annual meeting. Electronic copies of the duly signed proxy forms shall therefore be submitted no later than 3:00 p.m. on 15 October 2021 (Friday) at the Office of the Corporate Secretary, Far Eastern University, Nicanor Reyes St., Sampaloc, Manila for validation. A sample format of the proxy form for individual and corporate stockholders are attached and are also available at <https://www.feu.edu.ph/asm2021>.

The Corporate Secretary will lead the validation of proxies in coordination with the Corporation's stock and transfer agent.

The detailed guidelines for participation and voting for this meeting are set forth in the "Guidelines for Participation via Remote Communication and Voting in Absentia", attached as Annex "B" to this Information Statement.

REPORT OF THE AUDIT COMMITTEE TO THE BOARD OF TRUSTEES For the Fiscal Year Ended May 31, 2021

**The Board of Trustees
Far Eastern University, Inc.**

Nicanor Reyes Street
Sampaloc, Manila
P.O. Box 609 Philippines 1015
(+632) 87777-FEU (338)
(+632) 8849-4000

The Audit Committee's roles and responsibilities are defined in the Audit Committee Charter approved by the Board of Trustees. It assists the Board of Trustees in fulfilling its oversight responsibility for the University's financial reporting process, the system of internal control, the audit process, and the company's process for monitoring compliance with laws and regulations.

In compliance with the Audit Committee Charter, we confirm the following:

I. Audit Committee Structure and Process

1. The Audit Committee is composed of four (4) members (from June 1, 2020 to March 30, 2021), three (3) of whom are independent trustees including the Chair. One member, Angelina P. Jose, a dependent trustee, demised on March 30, 2021.
2. We had five (5) committee meetings which included one (1) joint meeting with the Risk Management Committee. All our meetings are covered by minutes of meetings approved by the members of the committee.

II. Internal and External Auditors and Internal Controls

1. We recommended for approval of the Board and endorsement to the shareholders the reappointment of Punongbayan and Araullo (P&A) as the Company's external auditor for the fiscal year 2020-2021 and the related audit fee.
2. We discussed and approved the overall scope and the respective audit plans of the company's internal auditors and external auditor. We also discussed the results of their audits and their assessment of the company's internal controls and found that the system is adequate and operating effectively.
3. We have reviewed and approved all audit services provided to Far Eastern University, Inc. including the related audit fees. There were no other non-audit services provided by P&A.
4. We have reviewed the reports of internal auditors ensuring that Management is taking the appropriate actions on the audit recommendations in a timely manner.

III. Financial Reporting

We reviewed, discussed, and endorsed for the approval of the Board, and subject to the limitations of the Committee's roles and responsibilities, the quarterly unaudited and annual audited consolidated statements of Far Eastern University, Inc. and Subsidiaries.

Based on the reviews and discussions undertaken, and subject to the limitations on our roles and responsibilities referred to above, the Audit Committee recommends to the Board of Directors that the audited consolidated financial statements be included in the Annual Report for the fiscal year ended May 31, 2021 for filing with the Securities and Exchange Commission and the Philippine Stock Exchange.

Business

Far Eastern University (FEU), Inc. – the business entity – was incorporated in 1933. It operates Far Eastern University – the higher education institution – and is the majority shareholder of East Asia Computer Center, Inc. (EACCI); FEU Alabang, Inc.; Far Eastern College Silang, Inc.; FEU High School, Inc.; and Roosevelt College, Inc. It is also a major shareholder in Fern Realty Corporation, which assists the FEU schools in their real estate requirements. In turn, EACCI does business under the names and styles FEU Institute of Technology (FEU Tech or FIT) and FEU Diliman, while Far Eastern College Silang, Inc., does so as FEU Cavite.

In addition, Far Eastern University, Inc., owns 51% of Edustria, Inc., in a joint venture with the Technological Institute of the Philippines (T.I.P.), Inc., which has a 49% stake. Edustria, Inc., operates a high school under the same name in the Lipa-Malvar area of Batangas province.

In the schools it operates, FEU, Inc., adopts a holistic approach to education, taking into consideration both academics and whole-person development, which includes, among others, the students' social, ethical, and emotional growth. FEU schools purposefully endeavor to foster an inclusive, nurturing, safe, and secure space set in beautifully designed campuses conducive for learning.

On 19 February 2021, FEU, Inc., received the One Golden Arrowhead Recognition from the ASEAN Corporate Governance Scorecard (ACGS) for being a top-performing publicly listed company in the Philippines.

A. Brief Discussion of Business

Mother Company

1. FAR EASTERN UNIVERSITY

Far Eastern University (FEU) was founded in 1928 as a private, nonsectarian institution of learning. Guided by the core values of fortitude, excellence, and uprightness, it aims to be a university of choice in Asia. Committed to the highest intellectual, moral, and cultural standards, the university strives to produce principled and professionally competent graduates, and nurtures a service-oriented and environment-conscious community that seeks to contribute to the advancement of the global society.

Tuition and other fees, which are the main sources of revenues, are moderate and subject to government regulation. Full and partial scholarship grants are awarded to deserving students.

FEU maintains excellent facilities to support the schooling experience of students. These include, among others, a library with an expanding electronic footprint; various types of laboratories; audio-visual and multi-media rooms including smart classrooms; conference, meeting, and multi-function rooms; an auditorium; gyms and other sports facilities; a clinic; and an information-technology enabled gate security system. All classrooms are spacious and air-conditioned – the ambient temperature powered campus-wide by an environmentally friendly district-cooling system, the first and apparently still the only one in a Philippine campus setting. Enrollment and financial operations are managed on NetSuite, an integrated, cloud-based enterprise resource planning (ERP) platform, while academic activities are organized on the state-of-the-art Canvas learning management system.

The university's high standard of quality is substantiated by numerous recognitions from the Philippine Commission on Higher Education (CHED); accrediting bodies such as the Philippine Association of Colleges and Universities Commission on Accreditation (PACUCOA) and the Philippine Accrediting Association of Schools, Colleges, and Universities (PAASCU); the ASEAN University Network – Quality Assurance (AUN-QA) system; and the World's Universities with Real Impact (WURI).

The CHED first conferred on FEU the autonomous university status on 25 July 2012. Then, adopting the stricter quality-assurance framework of CHED Memorandum Order 46 series of 2012, the commission affirmed the status per CHED Memorandum Order 20 series of 2016, extending its effectivity to 31 May 2019. Subsequently, CHED Memorandum Order 12 series of 2019 reaffirmed the university's autonomy through to 31 March 2021 and CHED Memorandum Order 7 series of 2021 extended it further to 31 May 2023.

For its part, the WURI ranked FEU 91st overall and 19th in the ethical value category during its inaugural run in 2020. In 2021, FEU's WURI rankings improved to 79th overall, 16th in ethical value, 42nd in entrepreneurial spirit, and 12th on crisis management. In both years, FEU was the only Philippine higher education institution in the top 100 universities of the WURI list.

Program Accreditations

Far Eastern University continuously strives for excellence in teaching, research and development, and extension work. Validations of this institutional effort include CHED citations of the teacher education programs of the IE as a Center of Excellence and the Bachelor of Science in Business Administration program of the IABF as a Center of Development.

Local Accreditations

Almost all of the academic programs in the Manila campus are accredited by the PACUCOA. The following programs had PACUCOA Level IV accreditation status (the highest) for the period December 2015 to December 2020 and, due to the covid-19 pandemic, have had to undergo their first Level IV Reaccreditation Visit in April 2021 as a virtual exercise, the official results of which are still pending:

- *Bachelor of Arts in Communication*
- *Bachelor of Elementary Education*
- *Bachelor of Science in Accountancy*
- *Bachelor of Science in Applied Mathematics with Information Technology*
- *Bachelor of Science in Biology*
- *Bachelor of Science in Business Administration*
- *Bachelor of Science in Psychology*
- *Bachelor of Secondary Education*

The *Bachelor of Science in Nursing* is the only academic program in the Manila campus that is accredited by the PAASCU. It has Level III Reaccredited status for the period August 2018 to November 2021.

The programs with PACUCOA Level III Reaccredited status from January 2020 to January 2022 Include:

- *Doctor of Education*
- *Master of Arts in Education*
- *Master of Arts in Psychology*

The programs with PACUCOA Level II Reaccredited status from January 2020 to January 2025 are:

- *Bachelor of Arts in International Studies*
- *Bachelor of Fine Arts*
- *Bachelor of Science in Architecture*
- *Bachelor of Science in Medical Technology*
- *Bachelor of Science in Tourism Management*

while those with the same status from May 2018 to May 2023 are:

- *Bachelor of Arts in Language and Literature Studies*
- *Bachelor of Arts in Political Science*
- *Bachelor of Science in Hotel and Restaurant Management*

Two graduate programs were granted the Candidate status by the PACUCOA for the period May 2018 to May 2020, but their accreditation exercises have had to be rescheduled due to the pandemic. These are:

- *Master of Arts in Communication*
- *Master of Science in Biology*

Similarly, the *Master of Arts in Nursing* program was conferred the Candidate status by the PAASCU from December 2018 to November 2020, but the accreditation visit has had to be rescheduled.

International Accreditations

Far Eastern University is a member of the ASEAN University Network – Quality Assurance, under which the following academic programs have successfully hurdled their assessment exercises in November 2020 and March 2021, respectively:

- *Bachelor of Science in Accountancy*
- *Bachelor of Science in Biology*
- *Bachelor of Science in Business Administration*
- *Bachelor of Science in Medical Technology*
- *Bachelor of Arts in Communication*
- *Bachelor of Science in Psychology*
- *Bachelor of Elementary Education*
- *Bachelor of Secondary Education*

Additionally, the ITHM's Bachelor of Science in Tourism Management program was accredited by Asia-Pacific Institute for Events Management (APIEM) as a Center of Excellence for the period February 2017 to February 2021.

Distribution methods of services: Being a higher education institution, Far Eastern University renders education services to students, either in-school or by remote learning modes.

Customers: Students

The university's revenues primarily come from tuition and other fees paid by students. Student fees from the following institutes contributed significantly (i.e., greater than or equal to 10%) to education income:

Institute	Percent Share of Revenues
IAS	34%
IABF	28%
ITHM	12%
IARFA	11%
IN	10%

Competition: Prestigious universities and colleges in the University Belt are FEU's main competition. The university competes with them through its reasonable tuition and other fees, which are subject to government regulation, and by the quality of its services as may be gleaned from the state of its physical plant and facilities and the reputation and capabilities of its faculty, among others. In addition, the university provides various scholarship grants, both for merit and due to need, to students who qualify. A distinctive feature of the university calendar is the annual cultural program prepared by the FEU Center for the Arts, which consists of performances by FEU cultural groups and guest artists, exhibits, lectures, and campus tours, all of which are provided for free.

Whistle-Blowing Policy: Far Eastern University encourages responsible whistle blowing and provides whistle blowers adequate protection. Irresponsible and indiscriminate accusations, however, are meted corresponding sanctions.

Subsidiaries and Other Related Parties

1. East Asia Computer Center, Inc.

Although incorporated in 1992, East Asia Computer Center, Inc. (EACCI), started doing business under the name and style FEU Institute of Technology (FIT or FEU Tech, for brevity) only in 2014. In March 2018, it began to use the name and style FEU Diliman as well.

a. FEU Institute of Technology

The FEU Institute of Technology is a private, nonsectarian college that provides quality education in the fields engineering and information technology. Housed in two structures – the Engineering Building on Nicanor Reyes Street and the 17-story FEU Tech Building on P. Paredes Street (both near the FEU Manila campus) – it has excellent facilities that include air-conditioned classrooms; well-equipped laboratories and engineering workshops; study areas for both individual and collaborative work; a library with a large collection of digital media; a covered gym; a 25-meter, four-lane, indoor swimming pool; exhibit areas; and multi-function rooms. Other notable features, found in the FEU Tech Building, are scenic elevators, an e-building high-tech security system; and an observation deck providing bird's-eye views of the Manila skyline.

FEU Tech offers innovative academic programs that are complemented by strong industry and academic partnerships, which provide students additional opportunities for immersive learning experiences. Students receive real-world training and work experience from an intense and well-designed internship program with industry partners – a network of some 800 technology and engineering corporations nationwide. In addition, study- and internship-abroad programs allow students to learn and be immersed in multicultural environments and cultures with partner schools in Taiwan and Korea.

The institute's high standard of quality is substantiated by program accreditations from the PAASCU and recognition from the WURI. In its 2021 run, WURI ranked FEU Tech 24th in entrepreneurial spirit.

Product: Organized as two colleges, the FEU Institute of Technology offers the following baccalaureate programs:

1. College of Computer Studies and Multimedia Arts
 - *Bachelor of Multimedia Arts*
 - *Bachelor of Science in Computer Science with specialization in Business Analytics*
 - *Bachelor of Science in Computer Science with specialization in Software Engineering*
 - *Bachelor of Science in Information Technology with specialization in Animation and Game Development*
 - *Bachelor of Science in Information Technology with specialization in Digital Arts*
 - *Bachelor of Science in Information Technology with specialization in Service Management and/or Business Analytics*
 - *Bachelor of Science in Information Technology with specialization in Web and Mobile Applications*
2. College of Engineering
 - *Bachelor Science in Civil Engineering*
 - *Bachelor of Science in Computer Engineering*
 - *Bachelor of Science in Electrical Engineering*
 - *Bachelor of Science in Electronic Engineering*
 - *Bachelor of Science in Mechanical Engineering*

Program Accreditations

The FEU Institute of Technology continuously strives for excellence in teaching, research and development, and extension work. Third-party affirmations of these initiatives are its program accreditations from the PAASCU.

Local Accreditations

Four academic programs of FEU Tech have Level II Accreditation status from the PAASCU:

- *Bachelor of Science in Computer Science with specialization in Software Engineering*
- *Bachelor of Science in Information Technology with specialization in Web and Mobile Application Development*
- *Bachelor of Science in Civil Engineering*
- *Bachelor of Science in Computer Engineering*

The first two enjoy their accreditation status until May 2021 and are due for reaccreditation in November 2021, while the last two have their status until May 2024.

b. FEU Diliman

FEU Diliman is a private, nonsectarian educational institution nestled in a neat 10-hectare campus in Mapayapa Village, Quezon City. It offers the full spectrum of formal education from basic education (i.e., kindergarten, grade school, junior and senior high school) to college.

The school has an advanced basic education curriculum that gives special emphasis to English, science, and mathematics and that integrates 21st-century-skills development. The students' holistic development is aimed for through their engagement in a wide array of sports, cultural, values formation, and socio-civic activities and programs. In addition, value-added courses are embedded in the curriculum to enable graduates to pursue higher education in the country's top universities.

FEU Diliman's higher education department aspires to become a professional institute (in the horizontal typology of CMO 46 series of 2012). Its academic programs are distinctive for their business-information technology fusion. The two pillars of its curriculum are the professional core courses for students to develop technical proficiency and long internships for students to gain deep familiarity with real-world practice. Using non-traditional, technology-facilitated delivery strategies, the academic programs foster deeper student engagement, better motivating the students to achieve the intended learning goals. Graduates are envisioned to be technology-empowered, highly qualified, and principled professionals and leaders who are poised to provide innovative solutions to the challenges they meet in their workplaces.

4. FEU High School, Inc.

FEU High School (FEU HS), Inc., was established as a subsidiary of Far Eastern University, Inc., in 2013 in response to Republic Act 10533 (otherwise known as the Enhanced Basic Education Act of 2013), which extended the Philippine basic education program to 13 years, adding Grades 11 and 12 to the secondary education level. Situated inside the FEU Manila campus, FEU HS welcomed its pioneer class of senior high school students in 2016.

Guided by the FEU core values, FEU High School provides quality education that prepares its graduates for college, the world of work, and life. Its curriculum is student-centered, values-driven, and competency-laden; its delivery methods are technology-enabled; and its learning activities are project based.

FEU HS's mission is to equip its students with basic and future-ready skills; healthy habits of mind; and positive, resilient attitudes. Students who fully engage the curriculum develop a keen awareness of self and are empowered to interact with the world in different dimensions, create their own future, and contribute to nation-building.

FEU HS implements design thinking as a teaching strategy. Its academic offerings are complemented by special programs that foster experiential learning and the development of leadership and social skills as well as service orientation in students. The school has more than 70 student clubs and organizations, ranging from sports and arts to special interest groups.

5. Roosevelt College, Inc.

Roosevelt College, Inc. (RCI), has a long history of providing quality education as a private, nonsectarian school, first as Marikina Academy in 1933 and as RCI since 1946. RCI became a member of the FEU Group of Schools in May 2016 when FEU Inc. purchased the 79.7% of RCI's outstanding capital stock (since increased to 97.3%) and gained management control of all campuses and affiliated companies. In 2019, RCI started to do business under the name and style FEU Roosevelt (FEUR).

Significantly contributing to the expansion of the FEU Group's geographic and demographic footprint and of basic education in its portfolio of program offerings, FEU Roosevelt is expected to carry FEU's distinctive marks of quality education and excellent facilities while improving the accessibility of such to more Filipino families. It currently operates three campuses, which are located in Marikina City, Metro Manila, and the municipalities of Cainta and Rodriguez, both of which are in Rizal province.

FEUR envisions the formation of a productive and responsible citizenry who are empowered through education.

Product: Organized as three campuses, FEU Roosevelt offers the full spectrum of academic program offerings from basic education to graduate school.

7. Fern Realty Corporation

Fern Realty Corporation (FRC) was established in 1984 primarily to assist FEU and eventually its subsidiary schools in their real estate requirements. For this purpose, the corporation acquired properties in Metro Manila and Silang, Cavite, which are currently leased to the FEU schools. In Silang, it has also constructed dormitory facilities and farm laboratories for the use of students and faculty members and a staff house for officers of FEU Cavite.

FRC is also engaged in developing and acquiring real properties for sale or lease. With Ayala Land, Inc., it co-developed Ferndale Homes in Quezon City; and with Moldex Realty Corporation, Fern Parc, a premium subdivision within MetroGate Silang Estate in Silang, Cavite. Its prime condominium units and residential houses in Makati City, Quezon City, and Taguig City are leased to local and foreign corporations and individuals. The latest additions to its asset portfolio are condominium units in Arbor Lanes, Arca South, Taguig City, as well as in Proscenium Residences at Rockwell, Two Roxas Triangle, and Park Central – all three of which are located in Makati City.

D. Management's Discussion and Analysis or Plan of Operation

As an academic institution, The Far Eastern University, Incorporated and its subsidiaries (The Group or FEU) is fully aware of the importance of education in nation building and to its students who benefit from quality instruction, research and community extension.

The Group is committed to continuously uplift academic standards through updating of its curricula, developing the faculty, improving the services to its students, and providing the best educational facilities.

Consolidated Financial Position

The Group continues to maintain a strong financial position, well enough to continuously sustain its operations and support its mission of delivering quality education to its students. For the past three years, the Group saw continuous asset growth, while managing liabilities and ensuring consistent build-up of stockholders' equity.

May 31, 2021 vs. May 31, 2020

The consolidated total assets as of May 31, 2021 grew by 2%, from P15,186.6 million last year to P15,421.4 million. Current assets went down by P370.5 million, from P4,531.8 million to P4,161.3 million, however, non-current assets registered an increment of P605.3 million, from P10,654.8 million to P11,260.0 million.

The increase in the consolidated total assets is due to the satisfactory results of operations during the year. On a per account basis, much of the increase is on the Group's investments – Financial assets at fair value through profit or loss (FVTPL), fair value through other comprehensive income (FVOCI) and investment securities at amortized cost. Consequently, Cash and cash equivalents declined due to outflows on investment and financing activities – financial investment acquisitions, debt repayments and cash dividend distribution. Asset increase was likewise tapered by fixed asset depreciation and amortization, and increased impairment losses on Trade and other receivables.

Consolidated total liabilities was trimmed by 13%, from P4,768.8 million last year to P4,156.2 million as of the current report date, mainly on account of repayments of interest-bearing loans. Deferred revenues also went down as classes for the ongoing semester/term were already completed, allowing recognition into income of previously deferred fees, while Income Tax payable was minimized because of the reduction of income tax rate for proprietary educational institutions, as provided for by the CREATE law.

Consolidated total equity sustained its growth trajectory mainly with the current year's net income. Total equity attributable to Parent company increased by 11%, while Non-controlling interest (NCI) grew by 2%, with current balances of P8,355.6 million and 2,909.6 million, respectively. Other than the net income, equity growth was due to an additional investment from NCI, by way of an additional issuance of preferred shares by East Asia Computer Center, Inc. (EACCI) and FEU Alabang, Inc. (FEUAI).

The Parent company was able to distribute cash dividends to stockholders amounting to P192.4 million and P329.5 million for the years ended May 31, 2021, and 2020, and stock dividends worth P757.9 million also in fiscal year 2020.

May 31, 2020 vs. May 31, 2019

As of May 31, 2020, the consolidated total assets reached a milestone P15,186.6 million, which was 8% above the previous year's P14,080.0 million. Current assets grew by 18%, from P3,848.9 million as of May 31, 2019 to P4,531.8 million as of May 31, 2020, while non-current assets inched higher by 4%, from P10,231.1 million as of May 31, 2019 to 10,654.8 million as of May 31, 2020.

The growth in consolidated total assets was fueled mainly by the results of operations during the year, financing from borrowings and investments from NCI. The Group saw balances of Cash and cash equivalents and Trade and other receivables grow significantly due to improvements in the operating activities as a result of the increase in student population. Property and equipment also increased due to the construction activities undertaken by FEUAI, EACCI and the University in its Manila campus.

Consolidated total liabilities increased by 13% to P4,768.8 million as of May 31, 2020, compared to previous year's P4,211.9 million. The increase was mainly on account of the higher year-end balance of Trade and other payables resulting from payment recording cut-off, and the outstanding balances of additional bank loans obtained during the year.

Non-current liabilities grew to P1,855.2 million from previous year's P1,041.2 million, while current liabilities declined to P2,913.6 million from P3,170.7 million last year.

Consolidated total equity improved by 6%, from P9,868.1 million as of the beginning of the fiscal year to P10,417.8 million as of May 31, 2020. The Group's consolidated equity, composed of the equity attributable to owners of the Parent company and NCI amounting to P7,556.5 million and P2,861.4 million, respectively, had sustained growths during the year.

Consolidated Results of Operations

During fiscal years 2019 and 2020, improved results of operations were expected as these years mark the first two years of return of freshmen enrollees in the tertiary schools as part of the K-12 transition. On the latter part of fiscal year 2020, however, unprecedented challenges brought about the corona virus disease (COVID-19) pandemic caused a cessation of the traditional face-to-face classes, and instead led to the transition to a remote learning modality. Fortunately, the FEU Group of schools had been investing heavily on online learning platforms since 2017, even before the onset of the pandemic – showing the Group's commitment to continuous innovation and improvement of its content and delivery of instructions to students.

Throughout the fiscal year 2021, the country remained under various quarantine restriction levels to curb the spread of COVID-19. Face-to-face classes remained suspended, due to people mobility and business activity restrictions. The Group faced certain challenges including the decline in enrollment, discounted assessed tuition fees, more relaxed financial accommodation for students to continue their education, higher default rates on student receivables and greater costs related to health and safety of personnel.

Despite such challenges, the Group's strict cost management measures, coupled with better than prior years' returns from investments in financial assets, timing of lower interest rates on bank loans, and tax savings due to lowered income tax rates based on the CREATE law, produced encouraging results for the current fiscal year. Below are the measures of the Group's operating performance for the fiscal years ended May 31, 2021, 2020 and 2019.

		2021	2020	2019
Return on assets	Net Income / Average Total Assets	6%	5%	6%

Return on equity	Net Income / Average Total Equity	9%	7%	9%
Earnings per share	Net Income / Average Outstanding Shares	P 40.28	P 25.92	P 31.41

May 31, 2021 vs. May 31, 2020

For the year ended May 31, 2021, the Group's operating income, showed a modest increase of 3% from last year to P794.1 million.

Educational revenues this year were affected by a student population decline of 11% and discounted tuition fees as a result of pandemic difficulties and full year online learning mode. Special credit considerations of an unprecedented volume for student promissory note availment representing 28% to total student population and 5% in absolute amount of total revenue were extended to students to assist with the continuation of their studies.

The comparative previous years educational revenues were likewise depressed due to tuition rebates from the sudden schedule disruption at the onset of the COVID-19 pandemic and the resulting cancellation of the third term for the trimestral schools of the FEU Group.

As a result educational revenue this year declined by only 1% and were recorded at P 3,522.4 million.

Operating expenses were reduced by P119.3 million, or 4% compared to the amount incurred in fiscal year 2020. This includes however additional Impairment losses, of P173.2 million, a three-fold increase from last year's P81.7 million. The Group recognized the need to provide additional allowance on its tuition fee receivables as a significant number of students with outstanding tuition balances did not enroll during the last two semesters or terms. In spite of the credit accommodations extended to students, it is still anticipated that some of the students' families will be hard-hit by the adverse economic effects of the pandemic.

The Group strictly managed usage and on-site driven expenses like utilities, outside services, supplies and materials, professional fees and transportation, among others.

Other non-operating items provided boost to the Group's performance as Finance and Miscellaneous income grew by 40% and 13%, respectively, while Finance cost dropped by 57%.

Investment income improved as market prices of investments started to bounce back compared to its lowest points during March to May 2020. Moreover, favorable impact was recognized on the cost side as banks offered accommodative interest rates on loans in addition to the effect of significant loan repayments made during the year.

The reduced income tax rate, from 10% to 1%, in accordance with the CREATE law also provided some relief.

Profit before tax amounted to P1,016.3 million while tax expense was at P37.0 million, resulting to the Group's net income after tax of P979.3 million, a 43% increase from last year.

May 31, 2020 vs. May 31, 2019

The Group's operating income for the fiscal year ended May 31, 2020 was registered at P771.9 million, a 16% improvement from preceding year. The main driver for this was 7% growth in educational revenues, to P3,556.3 million.

The educational revenues were generally expected to improve as this was the second year of enrolled freshmen in the tertiary schools after the initial implementation of the K-12 program. The anticipated revenue growth, however, was trimmed by fee rebates granted to students, amounting to P115.9 million. The University returned unutilized miscellaneous fees resulting from the shift to full online classes starting March 2020. The University's second semester started out normally during the first two months but had to switch to full online mode during the remaining three months.

Moreover, the expected full contribution to revenue from the trimestral schools of the Group, particularly EACCI and FEUAI, were curtailed by the COVID-19 pandemic, as a result of their third term revenue contribution of P153.0 million moved to August 2020 or to school year 2020-2021.

While organic operations still showed an improvement despite the then looming effect of the COVID-19 pandemic, other income posted a significant decline as it dropped by 95%, to only P12.6 million from prior year's P266.39 million. This is attributable to lower finance income already noted at the opening of year 2020 exacerbated by the slump in the financial markets caused by the nationwide lockdowns from March to May 2020, and further pulled down by increased interest charges on a larger loan principal base.

Income before tax settled at P784.6 million, while tax expense amounted to P101.6 million, resulting to a net income after tax of P683.0 million.

A Look at What Lies Ahead

With the COVID-19 pandemic affecting the Philippines and almost all countries around the world, management recognizes the Group's exposure to the risks in its business environment. Despite the FEU Group of schools' track record and proven capability to adapt to a remote learning environment, the continuous mutation of the COVID-19 resulting to potential surges in infections, pose a significant level of uncertainty, especially on the potential adverse economic impact on the general public's household income.

Despite such uncertainties, however, there is some reason for optimism as the government ramps up its vaccination efforts. To date, approximately 50% of the NCR population have received at least one dose of the vaccine. Moreover, the government's changes in quarantine strategy to a more focused granular levels of alert instead of region-wide/province-wide lockdowns is seen to allow more businesses to operate, thus, improving the general business condition and economic outlook. As from the start, the Group continues its commitment to undertake actions necessary to contribute to solving the problem of COVID-19 – from strict adherence to health and safety protocols, to providing free vaccines for its employees and to adapting flexible working arrangements to ensure a balance of service delivery to all stakeholders, students and employees, alike, without compromise to safety.

The management will continue to be prudent in the implementation of its business continuity plans, both at the corporate and the academic operational levels, to mitigate any foreseen

negative impacts on the overall operations. Cost efficiency and strict monitoring will continue to be the norm.

The Group remains committed to the vision of value-driven, accessible, and relevant quality education for students and a purposeful career for its faculty and employees.

The Group continues to endeavor to achieve effective management of its schools and other entities within the Group, practicing the values of fortitude, excellence, and uprightness in day-to-day operations.

This is one of those times, the call to Be Brave is heeded most.

Product/Service Standards

Teaching performance is constantly evaluated to maintain excellent quality of educational service delivery.

The University's high standard of quality is substantiated by numerous recognitions from the Commission on Higher Education (CHED), accrediting bodies such as the Philippine Association of Colleges and Universities Commission on Accreditation (PACUCOA) and the Philippine Accrediting Association of Schools, Colleges and Universities (PACUCOA), and other higher education-related local and international groups and organizations.

Moreover, performance of the graduates of the different FEU schools in their respective Professional Licensure Examinations on average is higher than national passing rates.

Market Acceptability

Below is a schedule of the Group's first semester enrollment for the past five years.

School Year	No. of Students	Increase / (Decrease)
2016 - 2017	36,839	-
2017 - 2018	33,764	-8%
2018 - 2019	40,713	21%
2019 - 2020	44,069	8%
2020 - 2021	39,361	-11%

For the past five years, the FEU Group of schools continuous to maintain substantial enrollments despite the challenges caused by the effects of the K-12 program and COVID-19 pandemic.

Other Items

1. As of report date, certain economic factors affect the revenues and income from the Group's operations. Such factors include the implementation of K-12 program (starting SY 2016-2017), the competition from tuition-free State Universities and Colleges, and the current COVID-19 pandemic being experienced around the world.
2. There are no known events that would result in any default or acceleration of an obligation.
3. Other than those disclosed in the financial statements, there are no other known events that will trigger direct or contingent financial obligation that may be material to the Group.
4. There are no other material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the Group with unconsolidated entities or other persons created during the reporting period.
5. The Group does not foresee any cash flow or liquidity problem in the next 12 months immediately following the report date. The Group and each of the component entities can easily meet all its commitments with its present reserves and expected earnings.
6. There are no significant elements of income or loss from continuing operations.
7. There are no sales of Unregistered or Exempt Securities including Recent Issuance of Securities Constituting an Exempt Transaction.
8. Seasonal aspects that have material effect on the financial statements:

For FEU Manila and FEU Cavite (Tertiary), there are three school terms within a fiscal year: Midyear Term (June to July for FEU Manila, while April to May for FEU Cavite), First Semester (August to December for FEU Manila, while June to October for FEU Cavite) and Second Semester (January to May for FEU Manila and November to March for FEU Cavite).

The first semester has the highest number of students enrolled. The second semester enrollment is approximately at 90% of the first semester's enrollment, while the midyear term is the lowest at an approximate of 33%. The maximum load, in terms of subject units, of a student during the summer term is only nine units, compared to 21 to 24 units during the first and second semesters.

For FEU Tech and FEU Alabang, there are three regular terms in a fiscal year: First Term (August to November), Second Term (November to March) and Third Term (March to June).

The tuition fee increase, if any, usually takes effect during the first semester of a particular school year. Thus, old rates are followed during the midyear term while new rates are applied during the first and second semesters. Since the first quarter is from June to August, the resulting income for the first quarter is at the lowest among the four quarters of the fiscal year.

9. The Group has no significant other operating segments beside education, its real estate activities are in place significantly to service the real estate needs of the operating schools. Investment and corporate activities are made to optimized reserve funds still with the objective of focusing resources in its core educational operations.

The Group reports geographical segments between metropolitan and provincial where campuses of FEU Schools are diversely located. The segment information is disclosed in Note 7 of the Consolidated Notes to Financial Statements.

E. Corporate Governance

Compliance with Leading Practices on Corporate Governance

1. Board of Trustee's Governance Responsibilities

- 1.1. Establish a Competent Board - Far Eastern University (FEU) is headed by a competent, working Board of Trustees (Board). The Board is composed of Trustees with a collective working knowledge, experience and expertise that are relevant to FEU's education industry.
- 1.2. Establish Clear Roles and Responsibilities of the Board - The fiduciary roles, responsibilities and accountabilities of the FEU Board as provided under the law, FEU's Articles of Incorporation and By-Laws, as amended, and other legal pronouncements and guidelines are clearly made known to all Trustees as well as to stockholders and other stakeholders of FEU.
- 1.3. Establish Board Committees - All of the Board Committees of FEU are set up to support the effective performance of the Board's functions. The composition, functions and responsibilities of all Board Committees established are contained in a publicly available Committee Charter.
- 1.4. Foster Board Commitment - To show their full commitment to FEU, its Trustees devote the time and attention necessary to properly and effectively perform their duties and responsibilities, including sufficient time to be familiar with FEU's business.

In amendments endorsed by the Corporate Governance Committee and ratified by the Board on 15 May 2018, FEU policies now (i) allow Trustees to attend meetings via teleconferencing or videoconferencing conducted in accordance with SEC rules; (ii) provide that the absence of a Trustee in more than 50% of all Board meetings during his/her incumbency is a ground for disqualification in the succeeding election; (iii) limit Trustees from concurrently serving as directors/trustees to a maximum of five publicly listed companies; and (iv) require a Trustee to notify the Chairman of the Board when he/she is invited to join the board of directors/trustees of another company, and to review with the Corporate Governance Committee before he/she accepts the invitation any potential conflict issues that may need to be brought before the Board.

- 1.5 Reinforce Board Independence - The FEU Board endeavors to exercise objective and independent judgment on all corporate affairs. And the Board has three Independent Trustees, or one-third of the nine-member Board of Trustees.
- 1.6 Strengthen Board Ethics - The members of the FEU Board are duty-bound to apply high ethical standards, taking into account the interests of all stakeholders.

2. Disclosure and Transparency

- 2.1. Enhance Disclosure Policies and Procedures - FEU had established corporate disclosure policies and procedures that are practical and in accordance with best practices and regulatory expectations.
- 2.2. Strengthen External Auditor's Independence and Improve Audit Quality - FEU had established standards for the appropriate selection of an External Auditor, and exercised effective oversight of its External Auditor to strengthen the latter's independence and enhance audit quality.
- 2.3. Increase Focus on Non-Financial and Sustainability Reporting - FEU had ensured that the material and reportable non-financial and sustainability issues are disclosed.

- 2.4. Promote a Comprehensive and Cost-Efficient Access to Relevant Information - FEU maintains a comprehensive and cost-efficient communication channel for disseminating relevant information. The channel is crucial for informed decision-making by investors, stakeholders and other interested users.

3. Internal Control System and Risk Management Framework

- 3.1. Strengthen Internal Control System and Enterprise Risk Management Framework - FEU has a strong and effective internal control system and enterprise risk management framework that ensures the integrity, transparency and proper governance in the conduct of its affairs.
- 3.2. FEU seeks external technical support in risk management when such competence is not available internally.

4. Cultivate Synergic Relationship with Shareholders

- 4.1. Promote Shareholder Rights - FEU treats all shareholders fairly and equitably, and also recognizes, protects and facilitates the exercise of their rights.
- 4.2. The minutes of the 17 October 2020 (a Saturday) Annual Meeting of FEU Stockholders were posted on the FEU website on 21 October 2020, three business days from the end of the meeting.

5. Duties to Stakeholders

- 5.1. Respect Rights of Stakeholders and Effective Redress for Violation of Stakeholders' Rights - FEU respects the rights of stakeholders established by law, contractual relations and through voluntary commitments. In FEU, where stakeholders' rights and/or interests are at stake, stakeholders have the opportunity to obtain prompt and effective redress for the violation of their rights.
- 5.2. Encourage Employees' Participation - FEU had developed a mechanism for employee participation that creates a symbiotic environment to realize FEU's goals and participate in its governance processes.

FEU has an active Union of its rank-and-file employees and another working Union of its faculty members. Both Unions have a collective bargaining agreement with FEU.

- 5.3. Encourage Sustainability and Social Responsibility - FEU is socially responsible in all its dealings with the communities where it operates. FEU ensures that its interactions serve its environment and stakeholders in a positive and progressive manner that is fully supportive of its comprehensive and balanced developments.

Report of Independent Auditors

The Board of Trustees and the Stockholders Far Eastern University, Incorporated and Subsidiaries

Nicanor Reyes Street,
Sampaloc, Manila

Opinion

We have audited the consolidated financial statements of Far Eastern University, Incorporated (the University) and subsidiaries (together hereinafter referred to as the Group), which comprise the consolidated statements of financial position as at May 31, 2021, 2020 and 2019 and the consolidated statements of profit or loss, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended May 31, 2021, and the notes to consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at May 31, 2021, 2020 and 2019, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended May 31, 2021 in accordance with Philippine Financial Reporting Standards (PFRS).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audits of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to Note 1 to the consolidated financial statements, which describes management's assessment of the continuing impact on the Group's consolidated financial statements of the business disruption brought by the COVID-19 pandemic. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

(a) Recognition of Tuition and Other School Fees***Description of the Matter***

Tuition and other school fees amounted to P3.5 billion, which accounts for 99% of the total revenues of the Group, for the year ended May 31, 2021 as shown in the Group's consolidated statements of profit or loss and in Note 18 to the consolidated financial statements. It involves significant volume of transactions and the Group is dependent on its information technology infrastructure in processing such voluminous transactions. Relative to this, any potential misstatements on tuition and other school fees could be material to the consolidated financial statements. Growth in tuition and other school fees is also one of the key performance measures used to assess the Group's performance. We therefore identified the recognition of tuition and other school fees as a significant risk requiring special audit consideration.

The Group's policy for revenue recognition and significant judgements used by management related to revenue recognition are more fully described in Notes 2 and 3 to the consolidated financial statements.

How the Matter was Addressed in the Audit

Our audit procedures included, among others, the following:

- Obtaining an understanding of the tuition and other school fees revenue recognition policy of the Group and the related processes and controls, and evaluating the Group's compliance with the requirements of PFRS 15, *Revenue from Contracts with Customers*;
- Testing of design and operating effectiveness of internal controls, including information technology general controls (i.e., security administration, program maintenance and program execution) and application controls, related to the Group's recognition and measurement of tuition and other school fees, including the related scholarship merits and tuition fee discounts, and payments from students;
- Examining students' enrollment transactions (i.e., through examination of tuition bills) and grant of scholarships merits and tuition fee discounts on a sampling basis during the school year;

- Performing revenue cut-off test procedures including, among others, examining tuition bill transactions near period end, and analyzing and reviewing revenue adjustments subsequent to period end to determine whether tuition and other school fees are appropriately recognized in the proper period; and,
- Performing substantive analytical review procedures over tuition and other school fees such as, but not limited to, current year's components of tuition and other school fees (e.g., by student population and by institute or college) as a percentage of total revenues, and yearly and monthly analyses of enrolment transactions based on our expectations, which include corroborating evidence from other audit procedures, and verifying the underlying data used in the analyses are valid and complete.

(b) Assessment of Goodwill Impairment

Description of the Matter

As at May 31, 2021, the balance of goodwill amounts to P186.5 million, which arose from the acquisition of Roosevelt College, Inc. (RCI) in May 2016 as disclosed in Note 3 to the consolidated financial statements. Under PFRS, goodwill, having indefinite useful life, is not subject to amortization but is required to be tested for impairment annually, or more frequently if events or changes in circumstances indicate that the carrying value of goodwill may be impaired. We have identified assessment of goodwill impairment as a key audit matter in our audit because management's assessment process is highly subjective being based on significant assumptions, such as revenue growth rate and discount rate, to determine the recoverable amount of the cash generating units (CGUs) where goodwill is allocated to and the future cash flows of that particular CGUs which are affected by expected future market or economic conditions. The more significant management's assumptions include:

- RCI, the CGU on which the goodwill is allocated to, will continue as a going concern;
- RCI will have sufficient financial resources to finance its working capital requirements to achieve its projected forecast and to support the business needs; and,
- RCI's growth in student population and viability of its performance forecasts for the next five years.

The Group's accounting policy on impairment of goodwill is included in Note 2 to the consolidated financial statements and the related disclosures are included in Note 3.

How the Matter was Addressed in the Audit

With the firm's valuation specialists, we independently checked the reasonableness of the assumptions and methodologies (i.e., discounted cash flows method) used by management, particularly those relating to the forecasted tuition fee rates and number of students assumed to project revenue growth and profit margins of RCI. In doing so, we have considered historical and environmental trends. We also focused on the adequacy of the Group's disclosure about those assumptions to which the outcome of the impairment test is most sensitive, that is, those that have the most significant effect on the determination of the recoverable amount of goodwill.

(c) Conduct of Audit Remotely*Description of the Matter*

As disclosed in Note 1 to the consolidated financial statements, a novel strain of coronavirus (COVID-19) started to become widespread in the Philippines in early March 2020. This caused the government to declare the country in a state of public health emergency followed by implementation of enhanced community quarantine (ECQ) and social distancing measures and restrictions within the Luzon area with other cities and provinces in the country enacting similar measures thereafter. The ECQ and social distancing measures implemented by the government resulted in performing the engagement remotely.

The change in working conditions is relevant and significant to our audit since it creates an increased risk of misstatements due to less in-person access to the Group's management and personnel, and lack of access to the physical records and original documents. Given the changes in how the audit will be performed, the audit requires exercising enhanced professional skepticism.

How the Matter was Addressed in the Audit

Our audit procedures to address the risk of performing the audit remotely included the following:

- Considering the nature of the engagement and the engagement team's knowledge of the entity and its environment when determining whether it is possible to perform a significant portion, if not all, of the engagement remotely;
- Following the requirements of PSA including providing proper supervision and review, even when working remotely;
- Obtaining information through electronic means, which includes sending and receiving of confirmation electronically, obtaining calculation in electronic form to check the mathematical accuracy, scanning of hard-copy items for review and using real-time inspection technology such as video and screen-sharing;
- Determining the reliability of audit evidence provided electronically using professional skepticism;
- Performing inquiries through video call in order to judge body language and other cues and to have a more interactive audit engagement; and,
- Examining critical electronic copy documents (e.g., contracts, progress billings, billing invoices, purchases invoices, and official receipts) in response to the risk in revenues and costs, which is considered to be significant.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Group's Securities and Exchange Commission (SEC) Form 20-IS (Definitive Information Statement) and SEC Form 17-A (but does not include the consolidated financial statements and our auditors' report thereon) and Annual Report for the year ended May 31, 2021. The SEC Form 20-IS, SEC Form 17-A and Annual Report for the year ended May 31, 2021 are expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audits resulting in this independent auditors' report is Mailene Sigue-Bisnar.

1. CORPORATE INFORMATION

1.1 Background of the University

The Far Eastern University, Incorporated (the University or FEU or Parent Company) is a 93-year-old Philippine-based proprietary educational institution founded in June 1928 and registered with the Securities and Exchange Commission (SEC) on October 27, 1933 and became a publicly-listed corporation with the Philippine Stock Exchange (PSE) on July 11, 1986.

The University is a nonsectarian institution of learning, embracing equal opportunity, inclusivity and diversity. FEU is comprised of seven institutes as follows, under each, handling distinct courses and programs of study:

- Institute of Arts and Sciences;
- Institute of Accounts, Business and Finance;
- Institute of Education;
- Institute of Architecture and Fine Arts;
- Institute of Nursing;
- Institute of Tourism and Hotel Management; and,
- Institute of Law.

FEU has been designated the Autonomous Status by the Commission on Higher Education (CHED) on July 25, 2012, with extended validity until May 31, 2023. Among the University's flagship programs are the Teacher Education and Business Administration which are recognized by the CHED as Center of Excellence and Center of Development, respectively.

On top of existing highly accredited programs of local accreditors, eight additional programs received the highest accreditation by the Philippine Association of Colleges and Universities Commission on Accreditation in 2021. Parallel International certifications by the ASEAN University Network – Quality Assurance were also granted similarly for eight programs namely Accountancy, Business Administration, Biology, Medical Technology, Psychology, Communication, Elementary and Secondary Education. While the Nursing program is accredited by the Philippine Accrediting Association of Schools, Colleges and Universities.

Further in the 2021 World's Universities with Real Impact (WURI) Ranking, FEU placed 79th in the Global Top 100 Innovative Universities. The University ascended the international rankings from last year's 91st position. Compared to other educational ranking systems, which evaluate quantitative metrics such as the number of journal publications and employment rate of graduates, WURI evaluates universities' flexible and innovative efforts to cultivate contributions to a workforce that meets the demands from industry and society at large.

As at May 31, 2021, 2020 and 2019, the University holds interest in the following subsidiaries which were all incorporated and are operating in the Philippines:

Company Name	Percentage of Effective Ownership		
	2021	2020	2019

* Indirectly through the University's ownership of RCI which owns 100% ownership interest in RCEE

**FEU's interest held in FRC changed as a result of a reverse stock split made by FRC

The parent company and its subsidiaries are collectively referred to herein as the Group.

Except FRC, which is a real estate company leasing most of its investment properties to the University and other related parties, all other directly owned subsidiaries are operating as educational institutions offering basic education, senior high school and/or tertiary and post graduate courses of study. RCEE, prior to the cessation of its operations, was engaged in selling educational school supplies and food items in campuses of RCI.

1.2 Impact of COVID-19 Pandemic on the Group's Operations

During fiscal years 2019 and 2020, improved results of operations were expected as these years marked the first two years of returning freshmen enrollees in the tertiary schools as part of the K-12 transition. However, the alarming pandemic level of COVID-19 on both a national and global scale brought about the 1st national level-mandated lockdown. Starting mid-March 2020, traditional face-to-face classes were suspended and full remote learning modality became the norm. Accordingly, the anticipated growth trajectory in student population, after K-12, came to an abrupt halt.

Throughout the fiscal year 2021, the country remained under various quarantine restriction levels to curb the spread of COVID-19. The resulting economic hardship on top of health concerns impacted students and their families greatly. The Group delivered academic instruction on an online basis for the entire year.

On the health front, FEU invested in making the work and future study places as safe as possible. Information campaigns on safety protocols, health tracking systems and procedures, retro arranging spaces and investments in disinfection and ventilation equipment were all undertaken. Moderna vaccine supplies were also purchased for the entire workforce of FEU. Vaccination with owned vaccines has commenced and this effort together with the local government unit's superb vaccination drive, will help reach the goal of top vaccination rate within the shortest possible time. The Group has also made the FEU Alabang campus available for the vaccination customers of Ayala Health.

On the operational front, face-to-face classes remained suspended throughout the year. The Group faced challenges including a decline in enrollment, reduced revenue from discounted assessed tuition fees, more relaxed financial accommodation to students intending to continue their education, higher receivable default rates and much higher but necessary costs related to health and safety of personnel.

The Group recognized additional impairment losses, a three-fold increase or P173.2 million increase from last fiscal year's P81.7 million (see Note 9).

Despite the 11% decrease in the Group's total student population in the fiscal year 2021, last year's tuition rebates (see Note 18.3) and cancellation of the third term for the trimestral schools have somehow narrowed down the decrease in educational revenues to only 1% – as core revenues were recorded at P3,522.4 million. During the fiscal year 2021, the Group did not implement any increase in tuition fees and, instead, gave special credit considerations to assist students and ease the effect of the prevailing economic burden on students' household. The University and its subsidiary schools combined, approved an unprecedented volume of student promissory note availment for the school year 2020-2021.

Fortunately, the FEU Group of schools invested heavily on this online learning platforms since 2017, as part of its strategic plans, even before the onset of the pandemic – showing the Group's commitment to continuous innovation and improvement of its content and delivery of instructions to students. Despite such challenges, the Group's strict cost management measures, coupled with better than prior years' returns from investments in financial assets, timing of lower interest rates on bank loans, and tax savings due to lowered income tax rates, have produced optimistic results for the current fiscal year.

Management projects that the Group will continue to report positive results of operations in the future and would remain liquid to meet current obligation as they fall due. Accordingly, management has not determined material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern.

1.4 Approval for Issuance of Consolidated Financial Statements

The consolidated financial statements of the Group as of and for the years ended May 31, 2021 (including the comparative consolidated financial statements as of and for the periods ended May 31, 2020 and 2019) were authorized for issue by the Group's Board of Trustees (BOT) on August 17, 2021.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies that have been used in the preparation of these consolidated financial statements are summarized below and in the succeeding pages. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation of the Consolidated Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The consolidated financial statements of the Group have been prepared in accordance with Philippine Financial Reporting Standards (PFRS). PFRS are adopted by the Financial Reporting Standards Council (FRSC) from the pronouncements issued by the International Accounting Standards Board (IASB), and approved by the Philippine Board of Accountancy.

The consolidated financial statements have been prepared using the measurement bases specified by PFRS for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies that follow.

(b) Presentation of the Consolidated Financial Statements

The consolidated financial statements are presented in accordance with Philippine Accounting Standard (PAS) 1, *Presentation of Financial Statements*. The Group presents the consolidated statements of comprehensive income separate from the consolidated statements of profit or loss.

The Group presents two comparative periods for the consolidated statements of financial position regardless whether the Group has or does not have retrospective restatement of items in its consolidated financial statements, or reclassifies items in the consolidated financial statements.

(c) Functional Currency

These consolidated financial statements are presented in Philippine pesos, the Group's functional and presentation currency, and all values represent absolute amounts except when otherwise indicated.

Items included in the consolidated financial statements of the Group are measured using its functional currency. Functional currency is the currency of the primary economic environment in which the Group operates.

2.2 Adoption of New and Amended PFRS

(a) Effective in Fiscal Year 2021 that are Relevant to the Group

The Group adopted for the first time the following amendments to PFRS, which are mandatorily effective for annual periods beginning on or after January 1, 2020:

Conceptual Framework	:	Revised Conceptual Framework for Financial Reporting
PAS 1 and PAS 8 (Amendments)	:	Presentation of Financial Statements and Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Material
PFRS 3 (Amendments)	:	Business Combinations – Definition of a Business
PFRS 7 and PFRS 9 (Amendments)	:	Financial Instruments: Disclosures and Financial Instruments – Interest Rate Benchmark Reform
PFRS 16 (Amendments)	:	Leases – COVID-19-Related Rent Concessions

Discussed as follows are relevant information about these pronouncements, unless otherwise noted, the application of these changes had no significant impact to the Group's financial statements:

- (i) *Revised Conceptual Framework for Financial Reporting.* The revised conceptual framework will be used in standard-setting decisions with immediate effect. Key changes include (a) increasing the prominence of stewardship in the objective of financial reporting, (b) reinstating prudence as a component of neutrality, (c) defining a reporting entity, which may be a legal entity, or a portion of an entity, (d) revising the definitions of an asset and a liability, (e) removing the probability threshold for recognition and adding guidance on derecognition, (f) adding guidance on different measurement basis, and, (g) stating that profit or loss is the primary performance indicator and that, in principle, income and expenses in other comprehensive income should be recycled where this enhances the relevance or faithful representation of the financial statements.
- (ii) PAS 1 (Amendments), *Presentation of Financial Statements*, and PAS 8 (Amendments), *Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Material.* The amendments provide a clearer definition of 'material' in PAS 1 by including the concept of 'obscuring' material information with immaterial information as part of the new definition, and clarifying the assessment threshold (i.e., misstatement of information is material if it could reasonably be expected to influence decisions made by primary users, which consider the characteristic of those users as well as the entity's own circumstances). The definition of material in PAS 8 has been accordingly replaced by reference to the new definition in PAS 1. In addition, amendment has also been made in other standards that contain definition of material or refer to the term 'material' to ensure consistency.

- (iii) PFRS 3 (Amendments), *Business Combinations – Definition of Business*. The amended definition of a business requires an acquisition to include an input and a substantive process that together significantly contribute to the ability to create outputs. The definition of the term ‘outputs’ is amended to focus on goods and services provided to customers, generating investment income and other income, and it excludes returns in the form of lower costs and other economic benefits. Also, the amendments will likely result in more acquisitions being accounted for as asset acquisitions.
- (iv) PFRS 7 (Amendments), *Financial Instruments: Disclosures*, and PFRS 9 (Amendments), *Financial Instruments – Interest Rate Benchmark Reform*. The amendments clarify that an entity would continue to apply certain hedge accounting requirements assuming that the interest rate benchmark on which the hedged cash flows and cash flows from the hedging instrument are based will not be altered as a result of interest rate benchmark reform.
- (v) PFRS 16 (Amendments), *Leases – COVID-19-Related Rent Concessions*. The amendments permit lessees, as a practical expedient, not to assess whether particular rent concessions occurring as a direct consequence of the COVID-19 pandemic are lease modifications and instead to account for those rent concessions as if they are not lease modifications.

(b) *Effective Subsequent to Fiscal Year 2021 but not Adopted Early*

There are amendments to existing standards effective for annual periods subsequent to fiscal year 2021, which are adopted by the FRSC. Management will adopt the following relevant pronouncements in accordance with their transitional provisions; and, unless otherwise stated, none of these are expected to have significant impact on the Group’s consolidated financial statements:

- (i) PFRS 16 (Amendments), *Leases – COVID-19-Related Rent Concessions beyond June 30, 2021* (effective from April 1, 2021). The amendment extends for one year the use of practical expedient, not to assess whether rent concessions reducing payments up until June 30, 2022 occurring as a direct consequence of the COVID-19 pandemic are lease modification and instead to account for those rent concessions as if they are not lease modifications.
- (ii) PFRS 3 (Amendments), *Business Combination – Reference to the Conceptual Framework* (effective from January 1, 2022). The amendments update an outdated reference to the Conceptual Framework in PFRS 3 without significantly changing the requirements in the standard.
- (iii) PAS 16 (Amendments), *Property, Plant and Equipment - Proceeds Before Intended Use* (effective from January 1, 2022). The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognizes the proceeds from selling such items, and the cost of producing those items, in profit or loss.

- (iv) PAS 37 (Amendments), *Provisions, Contingent Liabilities and Contingent Assets – Onerous Contracts – Cost of Fulfilling a Contract* (effective January 1, 2022). The amendments specify that the ‘cost of fulfilling’ a contract comprises the ‘costs that relate directly to the contract’. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labor, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).
- (v) Annual Improvements to PFRS 2018-2020 Cycle. Among the improvements, the following amendments, which are effective from January 1, 2022, are relevant to the Group:
- PFRS 9 (Amendments), *Financial Instruments – Fees in the ‘10 per cent’ Test for Derecognition of Liabilities*. The improvements clarify the fees a company includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability.
 - Illustrative Examples Accompanying PFRS 16 – *Lease Incentives*. The improvement merely removes potential for confusion regarding lease incentives.
- (vi) PAS 1 (Amendments), *Presentation of Financial Statements – Classification of Liabilities as Current or Non-current* (effective January 1, 2023). The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current.
- (vii) PFRS 10 (Amendments), *Consolidated Financial Statements*, and PAS 28 (Amendments), *Investments in Associates and Joint Ventures – Sale or Contribution of Assets Between an Investor and its Associates or Joint Venture* (effective date deferred indefinitely). The amendments to PFRS 10 require full recognition in the investor’s financial statements of gains or losses arising on the sale or contribution of assets that constitute a business as defined in PFRS 3 between an investor and its associate or joint venture. Accordingly, the partial recognition of gains or losses (i.e., to the extent of the unrelated investor’s interests in an associate or joint venture) only applies to those sale or contribution of assets that do not constitute a business. Corresponding amendments have been made to PAS 28 to reflect these changes. In addition, PAS 28 has been amended to clarify that when determining whether assets that are sold or contributed constitute a business, an entity shall consider whether the sale or contribution of those assets is part of multiple arrangements that should be accounted for as a single transaction.

2.3 Basis of Consolidation

The Group's consolidated financial statements comprise the accounts of the University and its subsidiaries as enumerated in Note 1.1, after the elimination of intercompany transactions. All intercompany balances and transactions with subsidiaries, including income, expenses and dividends, are eliminated in full. Unrealized profits and losses from intercompany transactions that are recognized in assets are also eliminated in full. In addition, shares of stock of the parent company held by the subsidiaries are recognized as treasury stocks and are presented as deduction in the consolidated statement of changes in equity (see Note 2.19). Intercompany losses that indicate impairment are recognized in the consolidated financial statements.

The following subsidiaries prepare their financial statements for their respective reporting periods using consistent accounting principles as that of the University:

<u>Subsidiaries:</u>	<u>Reporting Period*</u>
FRC	March 31, 2021
RCEE	March 31, 2021
FECSI	May 31, 2021
FEU High	May 31, 2021
RCI	May 31, 2021
Edustria	May 31, 2021
EACCI	June 30, 2021*
FEUAI	June 30, 2021*

**included in the Group's May 31, 2021 consolidated balances*

These subsidiaries follow their respective school years (i.e., trimestral and semestral), hence, the use of different reporting dates (non-coterminous year-ends) as compared with that of the University.

The University accounts for its investments in subsidiaries and non-controlling interests (NCIs) as follows:

(a) *Investments in Subsidiaries*

Subsidiaries are entities over which the Group has control. The Group controls an entity when it is exposed, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date the Group obtains control. The Group reassesses whether or not it controls an entity if facts and circumstances indicate that there are changes to one or more of the three elements of controls indicated above. Accordingly, entities are deconsolidated from the date that control ceases.

The acquisition method is applied to account for acquired subsidiaries (see Note 2.4).

(b) *Transactions with NCIs*

The Group's transactions with NCIs that do not result in loss of control are accounted for as equity transactions – that is, as transaction with the owners of the Group in their capacity as owners. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of the net assets of the subsidiary is recognized in equity. Disposals of equity investments in NCIs result in gains and losses which the Group also recognizes in equity.

When the Group ceases to have control over a subsidiary, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognized in consolidated profit or loss. The fair value is the initial carrying amount for purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in consolidated comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in consolidated statement of other comprehensive income are reclassified to consolidated profit or loss.

2.4 Business Combinations

Business acquisitions are accounted for using the acquisition method of accounting. This requires recognizing and measuring the identifiable assets acquired, the liabilities assumed and any NCI in the acquiree. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the University, if any. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred and subsequent change in the fair value of contingent consideration is recognized directly in consolidated profit or loss.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the University recognizes any NCI in the acquiree, either at fair value or at the NCI's proportionate share of the recognized amounts of acquiree's identifiable net assets.

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Subsequent to initial recognition, goodwill is measured at cost less any accumulated impairment losses.

Gain on bargain purchase, which is the excess of the Group's interest in the net fair value of net identifiable assets acquired over acquisition cost, is charged directly to income.

Gains and losses on disposal of an interest in a subsidiary include the carrying amount of goodwill relating to it.

If the business combination is achieved in stages, the acquirer is required to remeasure its previously held equity interest in the acquiree at its acquisition-date fair value and recognize the resulting gain or loss, if any, in the consolidated profit or loss or consolidated other comprehensive income, as appropriate.

Any contingent consideration to be transferred by the Group is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognized in accordance with PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, either in consolidated profit or loss or as a charge to consolidated other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

2.5 Financial Instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the financial instrument.

(a) Financial Assets

For purposes of classifying financial assets, an instrument is considered as an equity instrument if it is non-derivative and meets the definition of equity for the issuer in accordance with the criteria under PAS 32, *Financial Instruments: Presentation*. All other non-derivative financial instruments are treated as debt instruments.

Regular purchases and sales of financial assets are recognized on their trade date (i.e., the date that the Group commits to purchase or sell the asset). Deposits, amounts due to banks and customers, and loans are recognized when cash is received by the Group or advanced to the borrowers.

(i) Classification, Measurement and Reclassification of Financial Assets

The classification and measurement of financial assets is driven by the Group's business models for managing the financial assets and the contractual cash flow characteristics of the financial assets. The Group's classification and measurement of financial assets are described below.

Financial Assets at Amortized Cost

Financial assets are measured at amortized cost if both of the following conditions are met:

- the asset is held within the Group's business model whose objective is to hold financial assets in order to collect contractual cash flows ("held-to-collect"); and,
- the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Except for receivables that do not contain a significant financing component and are measured at the transaction price in accordance with PFRS 15, *Revenue from Contracts with Customers*, all financial assets meeting these criteria are measured initially at fair value plus transaction costs. These are subsequently measured at amortized cost using the effective interest method, less allowance for expected credit loss (ECL).

Where the business model is to hold assets to collect contractual cash flows, the Group assesses whether the financial instruments' cash flows represent SPPI. In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement [see Note 3.1(e)]. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss (FVTPL).

The Group's financial assets at amortized cost are presented in the consolidated statement of financial position as Cash and Cash Equivalents, Trade and Other Receivables, Short-term investments presented under Other Current Assets, Long-term investments and Refundable deposits presented under Other Non-current Assets and Investment Securities at Amortized Cost.

Financial assets measured at amortized cost are included in current assets, except for those with maturities greater than 12 months after the end of reporting period, which are classified as non-current assets.

In the presentation of cash flows, cash and cash equivalents comprise accounts with original maturities of three months or less, including cash. These generally include cash on hand, cash in bank, and short-term deposits.

Financial Assets at Fair Value Through Other Comprehensive Income (FVOCI)

The Group accounts for financial assets at FVOCI if the assets meet the following conditions:

- they are held under a business model whose objective is to hold to collect the associated cash flows and sell; and,
- the contractual terms of the financial assets give rise to cash flows that are SPPI on the principal amount outstanding.

At initial recognition, the Group can make an irrevocable election (on an instrument-by-instrument basis) to designate equity investments as at FVOCI; however, such designation is not permitted if the equity investment is held by the Group for trading or as mandatorily required to be classified as FVTPL. The Group has designated certain equity instruments as at FVOCI on initial recognition.

Financial assets at FVOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value, with no deduction for any disposal costs. Gains and losses arising from changes in fair value, including the foreign exchange component, are recognized in OCI, net of any effects arising from income taxes, and are reported as part of Revaluation Reserves account in equity. When the asset is disposed of, the cumulative gain or loss previously recognized in the Revaluation Reserves account is not reclassified to profit or loss but is reclassified directly to Retained Earnings, except for those debt securities classified as FVOCI wherein fair value changes are recycled to profit or loss.

Any dividends earned on holding these equity instruments are recognized in profit or loss as part of Other investment income under Finance Income account in the consolidated statement of profit or loss, when the Group's right to receive dividends is established, it is probable that the economic benefits associated with the dividend will flow to the Group, and the amount of the dividend can be measured reliably, unless the dividends clearly represent recovery of a part of the cost of the investment.

Financial Assets at FVTPL

Financial assets that are held within a different business model other than “hold to collect” or “hold to collect and sell” are categorized at FVTPL. Further, irrespective of business model, financial assets whose contractual cash flows are not SPPI are accounted for at FVTPL. Also, equity securities are classified as financial assets at FVTPL, unless the Group designates an equity investment that is not held for trading as at FVOCI at initial recognition. The Group’s financial assets at FVTPL include equity securities and investments in unit investment trust fund (UTF) which are held for trading purposes or designated as at FVTPL.

Financial assets at FVTPL are measured at fair value with gains or losses recognized in profit or loss as part of Other investment income under Finance Income account in the consolidated statement of profit or loss. Related transaction costs are recognized directly as expense in profit or loss. The fair values of these financial assets are determined by reference to active market transactions or using valuation technique when no active market exists.

Dividend income earned on these investments is reported as part of Other investment income under Finance Income account in the consolidated statement of profit or loss.

Interest income on debt financial assets measured at amortized cost and FVOCI is recognized using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The Group calculates interest income by applying the effective interest rate to the gross carrying amount of the financial assets, except for those that are subsequently identified as credit-impaired and or are purchased or originated credit-impaired assets (POCI assets).

For financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the net carrying amount of the financial assets (after deduction of the loss allowance). If the asset is no longer credit-impaired, the calculation of interest income reverts to gross basis. For POCI assets, interest income is calculated by applying a credit-adjusted effective interest rate to the amortized cost of the asset. The calculation of interest income does not revert to a gross basis even if the credit risk of the POCI asset subsequently improves.

Interest income earned is recognized in the statement of profit or loss as part of Finance Income.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are SPPI.

The Group can only reclassify financial assets if the objective of its business model for managing those financial assets changes. Accordingly, the Group is required to reclassify financial assets: (i) from amortized cost to FVTPL, if the objective of the business model changes so that the amortized cost criteria are no longer met; and, (ii) from FVTPL to amortized cost, if the objective of the business model changes so that the amortized cost criteria start to be met and the characteristic of the instrument's contractual cash flows meet the amortized cost criteria.

A change in the objective of the Group's business model will take effect only at the beginning of the next reporting period following the change in the business model.

(ii) *Impairment of Financial Assets*

The Group assesses its ECL on a forward-looking basis associated with its investment securities carried at amortized cost and debt instruments at FVOCI. No impairment loss is recognized on equity investments. Recognition of credit losses or impairment is no longer dependent on the Group's identification of a credit loss event. Instead, the Group considers a broader range of information in assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect collectability of the future cash flows of the financial assets.

The Group applies the simplified approach in measuring ECL, which uses a lifetime expected loss allowance for all tuition and other school fee receivables. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial assets.

To calculate the ECL, the Group uses its historical experience, external indicators and forward-looking information (FLI) to calculate the ECL using a provision matrix. The Group also assesses impairment of tuition and other school fee receivables on a collective basis as they possess shared credit risk characteristics, and have been grouped based on the number of semesters past due [see Note 4.2(b)].

For debt instruments measured at FVOCI and at amortized cost, the allowance for credit losses is based on the ECL associated with the probability of default of a financial instrument in the next 12 months, unless there has been a significant increase in credit risk since the origination of the financial asset, in such case, a lifetime ECL for a POCI asset, the allowance for credit losses is based on the change in the ECL over the life of the asset. The Group recognized a loss allowance for such losses at each reporting date.

The Group's definition of credit risk and information on how credit risk is mitigated by the Group are disclosed in Note 4.2.

The key elements used in the calculation of ECL are as follows:

- *Probability of Default (PD)* – it is an estimate of likelihood of a borrower defaulting on its financial obligation over a given time horizon, either over the next 12 months (12-month PD) or over the remaining lifetime (lifetime PD) of the obligation.

- *Loss Given Default (LGD)* – it is an estimate of loss arising in case where a default occurs at a given time (either over the next 12 months or 12-month LGD), or over the remaining lifetime (lifetime LGD). It is based on the difference between the contractual cash flows of a financial instrument due from a counterparty and those that the Group would expect to receive, including the realization of any collateral. It is presented as a percentage loss per unit of exposure at the time of default.
- *Exposure at Default (EAD)* – it represents the gross carrying amount of the financial instruments subject to impairment calculation; hence, this is the amount that the Group expects to be owed at the time of default over the next 12 months (12-month EAD) or over the remaining lifetime (lifetime EAD). In case of a loan commitment, the Group shall include the undrawn balance (up to the current contractual limit) at the time of default should it occur.

The measurement of the ECL reflects: (i) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; (ii) the time value of money; and, (iii) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Measurement of the ECL is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

(iii) *Derecognition of Financial Assets*

The financial assets (or where applicable, a part of a financial asset or part of a group of financial assets) are derecognized when the contractual rights to receive cash flows from the financial instruments expire, or when the financial assets and all substantial risks and rewards of ownership have been transferred to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

(b) *Financial Liabilities*

Financial liabilities, which includes interest-bearing loans, trade and other payables [except tax-related liabilities, Deposits payable and National Service Training Program (NSTP) trust fund], Derivative Liability and Refundable deposits (presented under Other Non-current Liabilities) are recognized when the Group becomes a party to the contractual terms of the instrument.

Interest-bearing loans are availed for capital expenditures and to provide general corporate funding requirements. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are charged to profit or loss on an accrual basis using the effective interest method and are added to the carrying amount of the instrument to the extent that these are not settled in the period in which they arise.

Trade and other payables account includes deposits payable which represents funds collected from students or entities and are held by the Group. The Group has no control over its use and disburses the funds only upon instruction of the student or entity that made the deposit. [see Note 2.11(a)].

Financial liabilities are recognized initially at their fair values and subsequently measured at amortized cost, except derivative liability which is consistently measured at fair value, using the effective interest method for maturities beyond one year, less settlement payments. The Group is no longer a party to foreign cross-currency swaps in 2020.

Dividend distributions to shareholders are recognized as financial liabilities upon declaration by the respective entities' BOD or BOT.

Financial liabilities are classified as current liabilities if payment is due to be settled within one year or less after the reporting period, or the Group does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Otherwise, these are presented as non-current liabilities.

Financial liabilities are derecognized from the consolidated statement of financial position only when the obligations are extinguished either through discharge, cancellation or expiration. The difference between the carrying amount of the financial liability derecognized and the consideration paid or payable is recognized in profit or loss.

(c) *Offsetting Financial Instruments*

Financial assets and financial liabilities are offset and the resulting net amount, considered as a single financial asset or financial liability, is reported in the consolidated statement of financial position when there is a legally enforceable right to set-off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously. The right of set-off must be available at the end of the reporting period, that is, it is not contingent on future event. It must also be enforceable in the normal course of business, in the event of default, and in the event of insolvency or bankruptcy; and, must be legally enforceable for both entity and all counterparties to the financial instruments.

2.6 Real Estate Held-for-Sale

Acquisition costs of raw land intended for sale, including other costs and expenses incurred to effect the transfer of title of the property as well as related property development costs, are accumulated in this account.

Real estate held-for-sale is carried at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs to complete and the estimated costs necessary to make the sale.

Real estate held-for-sale is expected to be sold within the normal operating cycle of FRC.

2.7 Prepayments and Other Assets

Prepayments and other assets pertain to other resources controlled by the Group as a result of past events. They are recognized in the consolidated financial statements when it is probable that the future economic benefits will flow to the Group and the asset has a cost or value that can be measured reliably.

Other recognized assets of similar nature, where future economic benefits are expected to flow to the Group beyond one year after the end of the reporting period, are classified as non-current assets.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.14).

Prepayment and other current assets of the Group include inventorable items such as books and merchandise. These are valued at the lower of cost and net realizable value. Cost is determined using the first-in, first-out method. The cost of these saleable inventories includes all costs directly attributable to acquisition, such as the purchase price, import duties, if any, and other taxes that are not subsequently recoverable from taxing authorities.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.14).

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

2.8 Property and Equipment

Except for land, which is stated at cost less any impairment in value, property and equipment are stated at cost less accumulated depreciation, amortization and impairment in value, if any.

The cost of an asset comprises its purchase price and directly attributable costs of bringing the asset to working condition for its intended use. Expenditures for additions, major improvements and renewals are capitalized; expenditures for repairs and maintenance are charged to expense as incurred.

Depreciation and amortization are computed on the straight-line basis over the estimated useful lives of the assets as follows:

Building and improvements	20 years
Furniture and equipment	3 - 6 years
Miscellaneous equipment	5 years

Construction in progress represents properties under construction and is stated at cost. This includes cost of construction, borrowing costs and other direct costs (see Note 2.16). The account is not depreciated until such time that the assets are completed and available for use.

Leasehold improvements are amortized over the estimated useful lives of 20 years or the remaining term of the lease, whichever is shorter.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.14).

The residual values, estimated useful lives and method of depreciation and amortization of property and equipment are reviewed and adjusted, if appropriate, at the end of each reporting period.

Fully depreciated and amortized assets are retained in the accounts until they are no longer in use and no further charge for depreciation and amortization is made in respect of those assets.

An item of property and equipment, including the related accumulated depreciation, amortization and impairment losses, is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in consolidated profit or loss in the period the item is derecognized.

2.9 Investment Properties

Investment properties are measured initially at acquisition cost. Subsequently, investment properties, except land, are carried at cost less accumulated depreciation and impairment in value, if any. Depreciation and amortization of investment properties, which consist of buildings and improvements and land improvements, are computed using the straight-line method over its estimated useful life of 20 years and 5 years, respectively. Land is carried at cost less impairment in value, if any.

Investment properties include construction in progress which represents condominium units of FRC that are still under construction and are stated at cost. This includes cost of construction, applicable borrowing costs (see Note 2.16) and other direct costs. The account is not depreciated until such time that the assets are completed and available for use.

Transfers are made to and from investment property when, and only when, there is a change in use, evidenced by the end or commencement of owner-managed, commencement of an operating lease to another party, by the end of construction or development, or commencement of development with a view to sell.

For a transfer from investment property to owner-occupied property or inventories, the cost of property for subsequent accounting is its carrying value at the date of change in use. If an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under Property and Equipment up to the date of change in use (see Note 2.8).

Investment property is derecognized upon disposal or when permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gain or loss on the retirement or disposal of an investment property is recognized in consolidated profit or loss in the year of retirement or disposal.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.14).

2.10 Provisions and Contingencies

Provisions are recognized when present obligations will probably lead to an outflow of economic resources and they can be estimated reliably even if the timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive commitment that has resulted from past events.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the end of the reporting period, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. When time value of money is material, long-term provisions are discounted to their present values using a pretax rate that reflects market assessments and the risks specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense. Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate.

In those cases where the possible outflow of economic resource as a result of present obligations is considered improbable or remote, or the amount to be provided for cannot be measured reliably, no liability is recognized in the consolidated financial statements. Similarly, possible inflows of economic benefits to the Group that do not yet meet the recognition criteria of an asset are considered contingent assets, hence, are not recognized in the consolidated financial statements. On the other hand, any reimbursement that the Group can be virtually certain to collect from a third party with respect to the obligation is recognized as a separate asset not exceeding the amount of the related provision.

2.11 Revenue and Expense Recognition

Revenue arises mainly from: (i) educational and related activities such as tuition and other school fees, income from sale of books and other merchandise, rental income from real estate and school campus' food concessionaires; and, (ii) investment-related transactions such as, investment income, dividend income from Financial Assets at FVTPL and at FVOCI, interest income and others.

The management determined that the revenues arising from educational and related activities are within the scope of PFRS 15, while rental income is covered by PFRS 16 (see Note 2.12). Investment-related revenues are subject to the provisions of PFRS 9 (see Note 2.5).

To determine whether to recognize revenue, the Group follows a five-step process:

1. Identifying the contract with a customer;
2. Identifying the performance obligation;
3. Determining the transaction price;
4. Allocating the transaction price to the performance obligations; and,
5. Recognizing revenue when/as performance obligations are satisfied.

The Group determines whether a contract with customer exists by evaluating whether the following gating criteria are present:

- (a) the parties to the contract have approved the contract either in writing, orally or in accordance with other customary business practices;
- (b) each party's rights regarding the goods to be transferred or performed can be identified;
- (c) the payment terms for the goods to be transferred or performed can be identified;
- (d) the contract has commercial substance (i.e., the risk, timing or amount of the future cash flows is expected to change as a result of the contract); and,
- (e) collection of the consideration in exchange of the goods and services is probable.

Revenue is recognized only when (or as) the Group satisfies a performance obligation by transferring control of the promised goods or services to a customer. The transfer of control can occur over time or at a point in time.

A performance obligation is satisfied at a point in time unless it meets one of the following criteria, in which case it is satisfied over time:

- (a) the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- (b) the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; and,
- (c) the Group's performance does not create an asset with an alternative use to the Group and the entity has an enforceable right to payment for performance completed to date.

The Group enters into transactions involving the tuition fees and other school fees and other school-related activities such as sale of school merchandise and books, and sale of real estate. There are no significant judgments used in determining the transaction price and the amount allocated to the performance obligations. Developing the knowledge and enhancing the abilities of the students represent promises to transfer a series of distinct goods that are substantially the same and that have the same pattern of transfer to the customer; therefore, the services rendered represent one performance obligation that is satisfied over time. The transaction price of the single performance obligation is recognized as revenue as the performance obligation is satisfied, which is usually throughout the school year or the semestral/trimestral period, whichever is applicable. With respect to the sale of school merchandise and books, the obligation is satisfied when the goods, particularly the merchandise and books are delivered to the customers. Hence, revenue is recognized at a point in time. As for real estate sales, the obligation is satisfied at the point the control over the properties is transferred by the FRC to the buyers.

In addition, the following specific recognition criteria must also be met before revenue is recognized [significant judgments in determining the timing of satisfaction of the following performance obligations are disclosed in Note 3(b)]:

- (a) *Educational revenues* – Revenue is recognized in profit or loss over the corresponding school term. Tuition fee received in advance and applicable to a school term after the reporting period is not recognized in profit or loss until the next reporting period and is presented as part of Deferred Revenues account in the consolidated statement of financial position. Payment for tuition fees is due upon enrollment, which is before the school year starts, and can be made either in full payment or installment.

Revenues from NSTP trust fund are recognized upon fulfillment of conditions attached to the fund and/or extent that the related expenses have been incurred. Restricted funds for which restrictions and conditions have not yet been met are classified as NSTP trust funds (liability) recorded as part of the Trade and Other Payables account in the consolidated statement of financial position.

- (b) *Sale of books and other educational-related merchandise* – Revenue is recognized at a point in time when the control of the goods have been passed to the buyer. This is generally when the customer has acknowledged delivery of goods. The sale of this merchandise is made for the Group's students. Payment for the transaction price is due immediately at the point the customer purchases the goods.
- (c) *Other fees* – This pertains to but not limited to transcripts, certification and graduation fees and fees for diplomas and identification cards. Revenue is recognized at the point in time when the related academic document is made available to requestors. Official receipts for the services are issued once request from students have been fulfilled.
- (d) *Real estate sales* – This pertains to sale of lots and completed townhouses of FRC. Revenue is recognized at the point the control to the property is passed to the customer, that is, when the property is transferred to the buyer.

In obtaining customer contracts, the Group incurs incremental costs. As the expected amortization period of these costs, if capitalized, would be less than one year, the Group uses the practical expedient in PFRS 15 and expenses such costs as incurred. The Group also incurs costs in fulfilling contracts with customers. However, as those costs are within the scope of other financial reporting standards, the Group accounts for those costs in accordance with accounting.

Cost and expenses are recognized in profit or loss upon utilization of goods or services or at the date such cost and expenses are incurred. All finance costs are reported in profit or loss on an accrual basis, except capitalized borrowing costs which are included as part of the cost of the related qualifying asset (see Note 2.16).

2.12 Leases

The Group accounts for its leases as follows:

- (a) *Group as Lessee*
 - (i) *Accounting for Leases in Accordance with PFRS 16 (beginning June 1, 2019)*

For any new contracts entered into on or after June 1, 2019, the Group considers whether a contract is, or contains, a lease. A lease is defined as a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration.

To apply this definition, the Group assesses whether the contract meets three key evaluations which are whether:

- the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group;
- the Group has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use, considering its rights within the defined scope of the contract; and,
- the Group has the right to direct the use of the identified asset throughout the period of use. The Group assess whether it has the right to direct 'how and for what purpose' the asset is used throughout the period of use.

At lease commencement date, the Group recognizes a right-of-use asset (ROUA) and a lease liability. The ROUA is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received). Subsequently, the Group depreciates the ROUA on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the ROUA or the end of the lease term. The Group also assesses the ROUA for impairment when such indicators exist (see Note 2.14).

On the other hand, the Group measures the lease liability at the present value of the lease payments unpaid at the commencement date, discounted using the interest rate implicit in the lease if that rate is readily available or the Group's incremental borrowing rate. Lease payments include fixed payments (including in-substance fixed) less lease incentives receivable, if any, variable lease payments based on an index or rate, amounts expected to be payable under a residual value guarantee, and payments arising from options (either renewal or termination) reasonably certain to be exercised. After initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is remeasured, the corresponding adjustment is reflected in the ROUA, or profit and loss if the ROUA is already reduced to zero.

The Group has elected to account for short-term leases and leases of low-value assets using the practical expedients. Instead of recognizing a ROUA and lease liability, the payments in relation to these are recognized as an expense in profit or loss on a straight-line basis over the lease term.

In the consolidated statement of financial position, ROUA and current portion of lease liabilities have been presented as part of Property and Equipment and Trade and Other Payables, respectively. Non-current portion of lease liabilities, on the other hand, has been presented separately in the consolidated statement of financial position.

(i) Accounting for Leases in Accordance with PAS 17 (Prior to June 1, 2019)

Leases which do not transfer to the Group substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments (net of any incentive received from the lessor) are recognized as expense in profit or loss on a straight-line basis over the lease term. Associated costs, such as repairs and maintenance and insurance, are expensed as incurred.

(b) Group as Lessor

Leases which do not transfer to the lessee substantially all the risks and benefits of ownership of the asset are classified as operating leases. Lease income from operating leases is recognized in profit or loss on a straight-line basis over the lease term and is presented as Rental in the consolidated statement of profit or loss.

The Group determines whether an arrangement is, or contains, a lease based on the substance of the arrangement. It makes an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

2.13 Foreign Currency Transactions and Translation

The accounting records of the Group are maintained in Philippine pesos. Foreign currency transactions during the year are translated into the functional currency at exchange rates which approximate those prevailing on transaction dates.

Foreign currency gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of profit or loss.

Changes in the fair value of monetary financial assets denominated in foreign currency classified as financial assets at FVOCI and at FVTPL are analyzed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortized cost are recognized in consolidated profit or loss, and other changes in the carrying amount are recognized in consolidated other comprehensive income.

2.14 Impairment of Non-financial Assets

The Group's property and equipment, investment properties, and certain other non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Goodwill is tested for impairment annually.

For purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows [cash-generating units (CGU)]. As a result, some assets are tested individually for impairment and some are tested at CGU level. An impairment loss is recognized in the consolidated profit or loss for the amount by which the asset's or CGU's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of fair value, reflecting market conditions less costs to sell, and value in use, based on an internal evaluation of discounted cash flows. In determining value in use, management estimates the expected future cash flows from each CGU and determines the suitable interest rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Group's latest approved budget, adjusted as necessary to exclude the effects of asset enhancements.

Discount factors are determined individually for each CGU and reflect management's assessment of respective risk profiles, such as market and asset-specific risk factors. Impairment loss is charged pro-rata to the other assets in the CGU.

All assets, except goodwill for which impairment loss is not reversed (see Note 2.4), are subsequently reassessed for indications that an impairment loss previously recognized may no longer exist. An impairment loss is reversed if the asset's or CGU's recoverable amount exceeds its carrying amount.

2.15 Employee Benefits

The Group, except RCI, provides post-employment benefits to employees through a defined contribution plan subject to compliance to a minimum guarantee required by Republic Act (RA) No. 7641, *The Retirement Pay Law*, which is accounted for as a defined benefit plan, and various compensations mandated by law. Such application of the minimum guarantee prescribed by RA No. 7641 is based on the interpretations issued by the Philippine Interpretations Committee (PIC) in its Question and Answer on PAS 19 – *Accounting for Employee Benefits Under a Defined Benefit Contribution Plan Subject to the Requirements of RA 7641*.

(a) Post-employment Benefits

The Group maintains defined contribution and defined benefit plans. Under the defined contribution plan, the Group (except RCI) pays fixed contributions based on the employees' monthly salaries.

RCI, which does not have a formal post-employment benefit plan, bases its determination of post-employment benefit obligation on RA No. 7641, which is considered a defined benefit plan. RA No. 7641 provides for a qualified employee a defined benefit minimum guarantee. The defined benefit minimum guarantee is equivalent to 75% of the last monthly salary of an employee at normal retirement age with the required credited years of service based on the provisions of RA No. 7641. The legal obligation for any benefits from this kind of post-employment plan remains with the entity even if plan assets, if any, for funding the defined benefit plan have been acquired.

Accordingly, the Group, (except RCI), recognizes its post-employment benefit obligation based on the higher of the defined benefit obligation relating to the minimum guarantee required by RA No. 7641 and the obligation arising from the defined contribution plan. On the other hand, RCI accrues its post-employment benefit obligation solely based on minimum guarantee requirement of RA No. 7641.

For defined benefit minimum guarantee plan, the liability is determined based on the present value of the excess of the projected defined benefit obligation over the projected defined contribution obligation at the end of the reporting period. The defined benefit obligation is calculated annually by a qualified independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows for expected benefit payments using a discount rate derived from the interest rates of a zero coupon government bonds [using the reference rates published by Bloomberg using its valuation technology, Bloomberg Valuation (BVAL)], that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related post-employment liability. BVAL provides evaluated prices that are based on market observations from contributed sources. The Group determines the net interest expense (income) on the defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to the defined benefit plan are recognized in profit or loss.

The defined contribution, on the other hand, is measured at the fair value of the defined contribution assets upon which the defined contribution benefits depend, with an adjustment for margin on asset returns, if any, where this is reflected in the defined contribution benefits.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in consolidated profit or loss. The Group recognizes gains or losses on the settlement of a defined benefit plan when the settlement occurs.

(b) *Termination Benefits*

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits when it is demonstrably committed to either: (i) terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or, (ii) providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after the reporting period are discounted to their present value.

(c) *Bonuses*

The Group recognizes a liability and an expense for bonuses. The Group recognizes a provision where it is contractually obliged to pay the benefits, or where there is a past practice that has created a constructive obligation.

(d) *Compensated Absences*

Compensated absences are recognized for the number of paid leave days (including holiday entitlement) remaining at the end of the reporting period. These are included in the Trade and Other Payables account in the consolidated statement of financial position at the undiscounted amount that the Group expects to pay as a result of the unused entitlement.

2.16 Borrowing Costs

Borrowing costs are recognized as expenses in the period in which they are incurred, except to the extent that they are capitalized. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset (i.e., an asset that takes a substantial period of time to get ready for its intended use or sale) are capitalized as part of cost of such asset. The capitalization of borrowing costs commences when expenditures for the asset and borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalization ceases when substantially all such activities are complete.

Investment income, if any, earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

2.17 Income Taxes

Tax expense recognized in profit or loss comprises the sum of current tax and deferred tax not recognized in other comprehensive income or directly in equity, if any.

Current tax assets or current tax liabilities comprise those claims from, or obligations to, fiscal authorities relating to the current or prior reporting period, that are uncollected or unpaid at the end of the reporting period. They are calculated using the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or liabilities are recognized as a component of tax expense in profit or loss.

Deferred tax is accounted for using the liability method on temporary differences at the end of the reporting period between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes. Under the liability method, with certain exceptions, deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences and the carryforward of unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Unrecognized deferred tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will be available to allow such deferred tax assets to be recovered.

Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled provided such tax rates have been enacted or substantively enacted at the end of the reporting period.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

The measurement of deferred tax liabilities and deferred tax assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Most changes in deferred tax assets or deferred tax liabilities are recognized as a component of tax expense in the consolidated profit or loss. Only changes in deferred tax assets or liabilities that relate to items recognized in the consolidated other comprehensive income or directly in equity are recognized in the consolidated other comprehensive income or directly in equity, respectively.

Deferred tax assets and deferred tax liabilities are offset only if the Group or any of its subsidiaries has a legally enforceable right to set-off current tax assets against current tax liabilities and the deferred taxes relate to the same taxation authority.

2.18 Related Party Transactions and Relationships

Related party transactions are transfers of resources, services or obligations between the Group and its related parties, regardless of whether a price is charged.

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the party in making financial and operating decisions. These parties include: (a) individuals owning, directly or indirectly through one or more intermediaries, control or are controlled by, or under common control with the Group; (b) associates; (c) individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the Group and close members of the family of any such individual; and, (d) certain funded retirement plans administered by an organization, through its Retirement Board.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on the legal form. The Group established policies and procedures on related party transactions in accordance with the regulations of the SEC. All material related party transactions, which exceed the established materiality thresholds, must undergo prior internal review from Audit Committee before endorsing for approval of the BOT. Further, the Chief Executive Officer, President, or any member of the Audit Committee may request that a related party transaction, regardless of amount, be reviewed by the Audit Committee if such related party transaction meet any of the qualitative factors affecting materiality threshold.

All individual material related party transactions shall be approved by at least two-thirds (2/3) vote of the BOT, with at least a majority of the independent trustees voting to approve such transactions. In case that a majority of the independent trustees' vote is not secured, the material related party transaction may be ratified by the vote of the stockholders representing at least two thirds (2/3) of the outstanding capital stock. For aggregate related party transactions within a twelve (12) month period that breaches the materiality threshold, the same board approval would be required for the transaction that meets and exceeds the materiality threshold covering the same related party.

2.19 Equity

Capital stock represents the nominal value of shares that have been issued.

Stock dividends distributable account is a stockholders' equity (paid-in capital) account credited for the par or stated value of the shares distributable when recording the declaration of a stock dividend until the stock is issued to shareholders.

Treasury stocks are stated at the cost of reacquiring such shares and are deducted from equity attributable to the University's equity holders until the shares are cancelled, reissued, retired, or disposed of. This also includes shares of the parent company held by a certain subsidiary (see Note 2.3).

Revaluation reserves comprise accumulated gains or losses arising from the revaluation of Financial Assets at FVOCI and remeasurements of post-employment defined benefit plan.

Other reserves refer to the amount attributable to the parent company arising from the changes in the ownership of the NCI in the Group.

Retained earnings, both restricted and available for dividend declaration, represent all current and prior period results of operations as reported in the consolidated statement of profit or loss. The appropriated portion represents the amount which is not available for distribution.

NCI represents the interests not held by the Group in FRC and RCI. It also includes the preferred shares of stock of EACCI and FEUAI issued to a stockholder outside of the Group but under the Group's common management (see Note 24.5).

2.20 Earnings Per Share

Basic earnings per share (EPS) is determined by dividing net profit or loss attributable to equity holders of the University by the weighted average number of shares subscribed and issued during the period after giving retroactive effect to stock dividend declared, stock split and reverse stock split during the current year, if any.

Diluted EPS is computed by adjusting the weighted average number of ordinary shares outstanding to assume conversion of dilutive potential shares. The Group does not have dilutive potential shares outstanding that would require disclosure of diluted EPS in the consolidated statement of profit or loss.

2.21 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Group's strategic steering committee, its chief operating decision-maker. The strategic steering committee is responsible for allocating resources and assessing performance of the operating segments.

In identifying its operating segments, management generally follows the Group's major geographical areas as disclosed in Note 7, which represent the breadth and reach of the Group's educational services.

Each of these operating segments is managed separately as each of these geographical areas requires different technologies and other resources, as well as marketing approaches. All intersegment transfers are carried out at arm's length prices.

The measurement policies the Group uses for segment reporting under PFRS 8, *Operating Segments*, are the same as those used in its consolidated financial statements.

In addition, corporate assets which are not directly attributable to the business activities of any operating segment are not allocated to a segment. There have been no changes from prior periods in the measurement methods used to determine reported segment profit or loss.

2.22 Events After the End of the Reporting Period

Any post-year-end event that provides additional information about the Group's consolidated financial position at the end of the reporting period (adjusting event) is reflected in the consolidated financial statements. Post-year-end events that are not adjusting events, if any, are disclosed when material to the consolidated financial statements.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Group's consolidated financial statements in accordance with PFRS requires management to make judgments and estimates that affect the amounts reported in the consolidated financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately differ from these estimates.

3.1 Critical Management Judgments in Applying Accounting Policies

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimation. The following judgments have the most significant effect on the amounts recognized in the consolidated financial statements:

(a) Determination of Lease Term of Contracts with Renewal and Termination Options (2021 and 2020)

In determining the lease term, management considers all relevant factors and circumstances that create an economic incentive to exercise a renewal option or not exercise a termination option. Renewal options and/or periods after termination options are only included in the lease term if the lease is reasonably certain to be extended or not terminated.

For leases of buildings, the factors that are normally the most relevant are
(a) if there are significant penalties should the Group pre-terminate the contract, and
(b) if any leasehold improvements are expected to have a significant remaining value, the Group is reasonably certain to extend and not to terminate the lease contract. Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The Group did not include the renewal period as part of the lease term for leases of university buildings because the terms are renewable upon the mutual agreement of the parties.

The lease term is reassessed if an option is actually exercised or not exercised or the Group becomes obliged to exercise or not exercise it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the Group.

(b) *Determination of Timing of Satisfaction of Performance Obligations*

The management determines that its revenue from tuition fees shall be recognized over time. In making its judgment, the Group considers the timing of receipt and consumption of benefits provided by the Group to the students. This demonstrates that the customers simultaneously receive and consume the benefits as the Group performs its obligation.

With respect to revenues from sale of merchandise and books, and various other school-related fees, the management deems that revenues shall be recognized at a point in time as control over the goods, particularly the merchandise, books and requested documents is transferred to the customers upon delivery.

With respect to sale of lots and completed townhouses, the Group satisfies the performance obligation at the point in time when the property is transferred to the customer (i.e., upon acknowledgment of the customer).

(c) *Determination of ECL on Tuition and Other Fee Receivables*

The Group uses a provision matrix to calculate ECL for tuition and other fee receivables. The loss rates are based on actual credit-impaired student accounts or those which are outstanding for two semesters and have not enrolled for the succeeding term [see Note 4.2(b)].

The Group's management intends to calibrate on an annual basis the matrix to consider the historical credit loss experience with forward-looking information. Details about the ECL on the Group's tuition fees and other receivables are disclosed in Notes 4.2 and 9.

(d) *Application of ECL to Investment Securities at Amortized Cost and Financial Assets at FVOCI*

The Group uses a general approach to calculate ECL for all debt instruments at FVOCI and amortized cost. The allowance for credit loss is based on the ECLs associated with the probability of default of a financial instrument in the next 12 months, unless there has been a significant increase in credit risk since origination of the financial instrument, in such case, a lifetime ECL for the instrument is recognized.

The Group has established a policy to perform an assessment, at the end of each reporting period, whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

(e) *Evaluation of Business Model Applied in Managing Financial Instruments*

The Group manages its financial assets based on business models that maintain adequate level of financial assets to match its expected cash outflows.

In determining the classification of a financial instrument under PFRS 9, the Group developed business models which reflect how it manages its portfolio of financial instruments. The Group's business models need not be assessed at entity level or as a whole but shall be applied at the level of a portfolio of financial instruments and not on an instrument-by-instrument basis (i.e., not based on intention or specific characteristics of individual financial instrument).

In determining the classification of a financial instrument under PFRS 9, the Group evaluates in which business model a financial instrument or a portfolio of financial instruments belong to taking into consideration the objectives of each business model established by the Group as those relate to the Group's investment, trading strategies.

(f) *Testing the Cash Flow Characteristics of Financial Assets and Continuing Evaluation of the Business Model*

In determining the classification of financial assets under PFRS 9, the Group assesses whether the contractual terms of the financial assets give rise on specified dates to cash flows that are SPPI on the principal outstanding, with interest representing time value of money and credit risk associated with the principal amount outstanding. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual term that changes the timing or amount of cash flows (unless it is a variable interest rate that represents time value of money and credit risk) does not meet the amortized cost criteria.

In cases where the relationship between the passage of time and the interest rate of the financial instrument may be imperfect, known as modified time value of money, the Group assesses the modified time value of money feature to determine whether the financial instrument still meets the SPPI criterion. The objective of the assessment is to determine how different the undiscounted contractual cash flows could be from the undiscounted cash flows that would arise if the time value of money element was not modified (the benchmark cash flows). If the resulting difference is significant, the SPPI criterion is not met. In view of this, the Group considers the effect of the modified time value of money element in each reporting period and cumulatively over the life of the financial instrument.

In addition, PFRS 9 emphasizes that if more than an infrequent sale is made out of a portfolio of financial assets carried at amortized cost, an entity should assess whether and how such sales are consistent with the objective of collecting contractual cash flows. In making this judgment, the Group considers certain circumstances documented in its business model manual to assess that an increase in the frequency or value of sales of financial instruments in a particular period is not necessarily inconsistent with a held-to-collect business model if the Group can explain the reasons for those sales and why those sales do not reflect a change in the Group's objective for the business model.

(g) *Determination of Control of Entities in which the University Holds Less than 50%*

Management considers that the University has de facto control of FRC even though it holds less than 50% of the ordinary shares and voting rights in the latter. Although the University holds less than 50% of the voting shares of stock of FRC, it has control over FRC because it is exposed or has right to variable returns from its involvement with FRC and it has the ability to affect those returns through its power over FRC. It is able to do this primarily because the University has the power to cast the majority of votes at meetings of the BOD and elect officers of FRC. Accordingly, FRC is recognized as a subsidiary of the University (see Note 1.1).

(h) *Distinction between Investment Properties and Owner-managed Properties*

The Group determines whether a property qualifies as investment property. In making its judgment, the Group considers whether the property generates cash flows largely independent of the other assets held by an entity.

Owner-managed properties generate cash flows that are attributable not only to the property but also to other assets used in the process of providing educational services. Some properties comprise a portion that is held to earn rental or for capital appreciation and another portion that is held for use in the supply of services or for administrative purposes. If a portion can be sold separately (or leased out separately under finance lease), the Group accounts for such portion separately. If the portion cannot be sold separately, the property is accounted for as investment property only if an insignificant portion is held for use in the supply of services or for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

(i) *Distinction between Real Estate for Sale and Investment Properties*

Real estate for sale comprise lots that are held for sale in the ordinary course of business (see Note 11). Meanwhile, investment properties (see Note 14) comprise of land and buildings which are not occupied substantially for use by, or in the operations of, the Group, nor for sale in the ordinary course of business, but are held primarily to earn rental income and capital appreciation. The Group considers management's intention over these assets in making its judgement.

(j) *Distinction between Operating and Finance Lease (2019)*

The Group has entered into various lease agreements as either a lessor or a lessee. Judgment was exercised by management to distinguish each lease agreement as either an operating or finance lease by looking at the transfer or retention of significant risk and rewards of ownership of the properties covered by the agreements. Failure to make the right judgment will result in either overstatement or understatement of assets and liabilities. Currently, all of the Group's lease agreements are determined to be operating leases.

(k) *Recognition of Provisions and Contingencies*

Judgment is exercised by management to distinguish between provisions and contingencies. Accounting policies on recognition and disclosure of provisions and contingencies are discussed in Note 2.10 and relevant disclosures are presented in Note 26.

3.2 Key Sources of Estimation Uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period:

(a) Determination of Appropriate Discount Rate in Measuring Lease Liabilities (2021 and 2020)

The Group measures its lease liabilities at present value of the lease payments that are not paid at the commencement date of the lease contract. The lease payments were discounted using a reasonable rate deemed by management equal to the Group's incremental borrowing rate. In determining a reasonable discount rate, management considers the term of the leases, the underlying asset and the economic environment. Actual results, however, may vary due to changes in estimates brought about by changes in such factors.

(b) Estimation of Allowance for Impairment of Financial Instruments

The measurement of the allowance for ECL on financial assets at FVOCI and at investment securities at amortized cost is an area that requires the use of significant assumptions about the future economic conditions and credit behavior (e.g., likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation used in measuring ECL is further detailed in Note 4.2.

The Group uses a provision matrix to calculate ECL for its trade receivables which are based on the Group's historical observed default rates. The Group's management intends to calibrate on an annual basis the matrix to consider the historical credit loss experience with forward-looking information.

(c) Determination of Fair Value Measurement for Financial Instruments

Management applies valuation techniques to determine the fair value of financial instruments where active market quotes are not available. This requires management to develop estimates and assumptions based on market inputs, using observable data that market participants would use in pricing the instrument. Where such data is not observable, management uses its best estimate. Estimated fair values of financial instruments may vary from the actual prices that would be achieved in an arm's length transaction at the end of the reporting period.

The carrying values of the Group's Financial Assets at FVTPL and at FVOCI and the amounts of fair value changes recognized during the years on those assets are disclosed in Note 10 while fair value gains or losses on cross-currency swap agreements are presented as fair value gain or loss on derivative liability under Finance Income or Finance Costs in the consolidated statement of profit or loss (see Note 20).

(d) *Estimation of Useful Lives of Investment Properties and Property and Equipment*

The Group estimates the useful lives of investment properties and property and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of these assets are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

The carrying amounts of property and equipment and investment properties are presented in Notes 12 and 14, respectively. Based on management's assessment as at May 31, 2021, 2020 and 2019, there is no change in the estimated useful lives of the assets during those years. Actual results, however, may vary due to changes in factors mentioned above.

(e) *Determination of Fair Value of Investment Properties*

Investment properties are measured using the cost model. The fair value disclosed in Note 14 is determined by the Group based on the appraisal report prepared by independent appraisers using the relevant valuation methodology as discussed in Note 6.4.

For investment properties with appraisal conducted prior to the end of the current reporting period, management determines whether there are significant circumstances during the intervening period that may require adjustments or changes in the disclosure of fair value of those properties.

The principal assumptions underlying management's estimation of fair value are those related to the receipt of contractual rentals, expected future market rentals, and appropriate discount rates. These valuations are regularly compared to actual to market yield data, and actual transactions by the Group and those reported by the market.

A significant change in these elements may affect the prices and the value of the assets. As of May 31, 2021, 2020 and 2019, the Group determined that there were no significant circumstances that may affect the fair value determination of investment properties.

(f) *Estimation of Impairment of Non-financial Assets*

The Group's policy on estimating the impairment of non-financial assets is discussed in detail in Note 2.14. Though management believes that the assumptions used in the estimation of recoverable amounts are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable values and any resulting impairment loss could have a material adverse effect on the results of operations.

Based on management's assessment, no impairment loss is required to be recognized on the Group's investment properties, property and equipment, goodwill and certain other non-financial assets as for the years ended May 31, 2021, 2020 and 2019.

As at the acquisition date of RCI on May 12, 2017, the fair value of the University's share in RCI's net identifiable assets amounts to P621.8 million resulting in the recognition of goodwill amounting to P186.5 million. The goodwill arising from the acquisition consists largely of the synergies and economies of scale expected from combining the operations of the University and RCI. The goodwill recognized is subject to annual impairment testing [see Notes 2.4 and 2.14].

For purposes of assessing impairment, the Group based on the value in use of the CGU (that is, RCI) to which the carrying value of goodwill is compared. This methodology is in accordance with PAS 36, *Impairment of Assets*. The management considers that the benefits of acquisition accrue to the University as a whole and not to a specific business unit nor department only.

In determining the value in use, discounted cash flows method was used. Some of the key assumptions that have been considered which have significant impact on the results of the determination of the value in use are as follows:

- RCI will continue as a going concern entity and will have sufficient financial resources to finance its working capital requirements to achieve its projected forecast and to support its business needs;
- RCI's performance forecasts for the next five years from the end of each reporting period;
- In estimating the terminal value of the CGU, long-term growth rates at 2.0%, 1.0% and 1.2% (based on forecasted gross domestic product growth rate) as of May 31, 2021, 2020 and 2019 was used, respectively; and,
- In discounting the projected free cash flows, weighted average cost of capital of 4.88%, 4.76% and 6.79% was used in 2021, 2020 and 2019, respectively.

For the years ended May 31, 2021, 2020 and 2019, the Group has assessed that the recoverable amount of the goodwill of P3.7 billion, P3.0 billion and P1.6 billion, respectively, exceeds its carrying amount. Accordingly, no impairment loss is required to be recognized in 2021, 2020 and 2019.

(g) *Determination of Recoverability of Deferred Tax Assets*

The Group reviews its deferred tax assets at the end of each reporting period and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Management assessed that the deferred tax assets as at May 31, 2021, 2020 and 2019 are fully recoverable and will be fully utilized within the prescribed periods, except for the related benefits of net operating loss carryover (NOLCO) and other temporary differences of certain subsidiaries which are not recognized, because it expects that the Group will generate sufficient taxable profits in the future against which the assets can be applied (see Note 22).

(h) *Valuation of Post-employment Defined Benefit Obligation*

The determination of the obligation and cost of post-employment defined benefit is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include, among others, discount rates, expected rate of return on plan assets, salary rate increase, and employee turnover rate. A significant change in any of these actuarial assumptions may generally affect the recognized expense, other comprehensive income or losses and the carrying amount of the post-employment benefit obligation in the next reporting period.

The amounts of post-employment benefit obligation and expense and an analysis of the movements in the estimated present value of post-employment defined benefit, as well as the significant assumptions used in estimating such obligation are presented in Note 21(b).

4. RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group is exposed to certain financial risks in relation to financial instruments. Its main purpose for its dealings in financial instruments is to fund operational and capital expenditures. The BOT has overall responsibility for the establishment and oversight of the Group's risk management framework. It has a risk management committee headed by an independent trustee that is responsible for developing and monitoring the Group's policies, which address risk management areas.

Management is responsible for monitoring compliance with the Group's risk management policies and procedures and for reviewing the adequacy of these policies in relation to the risks faced by the Group.

The Group does not engage in trading of financial assets for speculative purposes nor does it write options. The most significant financial risks to which the Group is exposed to are described in the succeeding pages.

4.1 *Market Risk*

(a) *Foreign Currency Risk*

Most of the Group's transactions are carried out in Philippine pesos, its functional currency. Exposures to currency exchange risk arise from certain cash and cash equivalents, financial assets at FVTPL, financial assets at FVOCI and investment securities at amortized cost that are primarily denominated in United States (US) dollars.

Financial assets denominated in US dollar, translated into Philippine pesos at the closing rate, as of May 31 are presented below.

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Short-term exposure – Financial assets	<u>P 663,078,157</u>	<u>P 409,534,498</u>	<u>P 561,752,399</u>
Long-term exposure – Financial assets	<u>P 120,685,405</u>	<u>P 162,277,191</u>	<u>P 228,040,069</u>

The following table illustrates the sensitivity of the Group's profit or loss before tax with respect to changes in Philippine peso against US dollar exchange rates. The percentage changes in rates have been determined based on the average market volatility in exchange rates, using standard deviation, in the previous periods (for the years ended May 31, 2021, 2020 and 2019) at a 95% confidence level.

	2021			2020			2019		
	Reasonably possible change in rate	Effect in profit before tax	Effect in equity	Reasonably possible change in rate	Effect in profit before tax	Effect in equity	Reasonably possible change in rate	Effect in loss before tax	Effect in equity

Exposures to US dollar exchange risk vary during the year depending on the volume of foreign currency denominated transactions. Nonetheless, the analysis above is considered to be representative of the Group's currency risk.

(b) *Interest Rate Risk*

The Group is exposed to changes in market interest rates through its cash and cash equivalents, short and long-term debt securities investments, and interest-bearing loans as of end of each reporting period, which are subject to variable interest rates, and is shown below. All other financial assets and financial liabilities have fixed interest rates.

	Notes	2021	2020	2019

The table shown below illustrates the sensitivity of profit or loss before tax for the periods with regard to the Group's interest-bearing financial instruments. These percentages have been determined based on the average market volatility rates, using standard deviation, in the periods ended May 31, 2021, 2020 and 2019, estimated at 95% level of confidence. The sensitivity analysis is based on the Group's financial instruments held at May 31, 2021, 2020 and 2019.

(c) *Other Price Risk*

The Group's exposure to price risk arises from its investments in equity securities, which are classified as part of the Financial Assets at FVOCI and Financial Assets at FVTPL accounts in the consolidated statements of financial position. These consist of publicly listed equity securities which are carried at fair value.

Management monitors its equity securities in its investment portfolio based on market indices. Material investments within the portfolio are managed on an individual basis.

For equity securities listed in the Philippines, an average volatility have been observed for the years ended May 31, 2021, 2020 and 2019 which was shown on the table below.

	Effect on Total Comprehensive Income					
	+/-%	2021	+/-%	2020	+/-%	2019
Financial assets at FVTPL	16.30%	P898,992,320	32.81%	P 153,750,667	13.26%	P 67,619,740
Financial assets at FVOCI	18.85%	171,889,527	19.00%	25,786,424	15.58%	21,029,362

No sensitivity analysis was provided for government and corporate bonds, and investments in UITF classified as Financial Assets at FVTPL as management deemed that the risk at the end of the period is not representative of a risk inherent in the Group's financial instruments.

Certain investments are considered medium to long-term strategic investments. In accordance with the Group's policies, no specific hedging activities are undertaken in relation to these investments. The investments are continuously monitored to ensure that returns of these equity instruments are timely utilized or reinvested in the Group's favor.

4.2 *Credit Risk*

Credit risk represents the loss that the Group would incur if the counterparty fails to perform its contractual obligations.

The Group is mainly exposed to credit risk relating to its tuition and other school fees receivables due primarily to the student's possible inability to pay and to fully settle his or her unpaid balance of tuition fees and other charges which are owed to the Group based on installment payment schemes. The Group has established controls and procedures to minimize risks of non-collection. Students are not allowed to enroll in the following semester unless the unpaid balance in the previous semester has been paid. The Group also withholds the academic records and clearance of the students with unpaid balances, thus ensuring that collectability is reasonably assured. The Group's exposure to credit risk on its other receivables from debtors and related parties is managed through close account monitoring and setting limits.

Other than the foregoing, the Group is not exposed to significant credit risk and has no significant exposure to any individual customer or counterparty nor it has any other concentration of credit risk arising from counterparties in similar business activities, geographic region or economic parties.

With respect to credit risk arising from debt instruments, the Group's maximum exposure is equal to the carrying amount, before any allowances for impairment, of these instruments.

The maximum exposure to credit risk at the end of the reporting period is as follows:

	Notes	2021	2020	2019

a. Cash and Cash Equivalents, and Short-term Placements

The credit risk for cash and cash equivalents, and short-term placements herein is considered negligible or the probability of default from these reputable banks is remote since there has been no history of default from these counterparties and because of their high-quality external credit ratings.

Cash in banks are insured by the Philippine Deposit Insurance Corporation (PDIC) up to a maximum coverage of P0.5 million per depositor per banking institution, as provided for under RA No. 9576, *Amendment to Charter of PDIC*.

For cash and cash equivalents, and financial assets of similar nature, the Group applies the low credit risk simplification. The probability of default and loss given defaults are publicly available and are considered to be low credit risk investments. It is the Group's policy to measure ECL on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL.

As of May 31, 2021, 2020 and 2019, management assessed that the allowance for ECL on these financial instruments is not material.

b. Trade and Other Receivables

The Group's trade and other receivables include tuition fees and other school receivables, rental receivables and other miscellaneous receivables.

The Group applies the simplified approach in measuring ECL, which uses a lifetime expected loss allowance for tuition fees and other receivables. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial assets. To calculate the ECL, the Group uses its historical experience, external indicators and forward-looking information to calculate the ECL using a provision matrix. The loss rates are based on actual credit-impaired student accounts or those which are outstanding for two terms and have not enrolled for the succeeding term. In practice and considering the nature of its business, particularly with respect to its educational activities, the Group writes off such balances as collection becomes more unlikely as the concerned students did not return for enrollment. The Group also assesses impairment of tuition fees and other receivables on a collective basis as they possess shared credit risk characteristics.

The expected loss rates on these receivables are determined based on the history of credit-impaired student accounts. The Group analyses tuition and other school fees receivables based on the number of semesters the receivables have been outstanding. Student receivables that are outstanding for at least two semesters are assessed for credit impairment.

The historical loss rates, which are expressed as the relationship between the credit-impaired accounts and the related recognized tuition fees, are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the students to settle the receivables. The Group assessed that the expected loss rates for tuition fees and other receivables are a reasonable approximation of the loss rates for these financial assets. As at May 31, 2021, 2020 and 2019, the weighted average loss rate, adjusted with FLI, used in the measurement of ECL is at 6.4%, 8.4% and 4.7%, respectively.

The Group incorporates FLI into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL. The most relevant macro-economic variable used in the measurement of ECL is consumer spending as at May 31, 2021, 2020 and 2019 based on the correlation of historical loss rates and FLI.

The Group writes off its receivables from students who have not enrolled for two terms and are not expected by management to re-enroll in the near future.

For the years ended May 31, 2021, 2020 and 2019, the Group recognized total impairment losses amounting to P254.8 million, P81.7 million and P27.0 million, respectively. A reconciliation of the allowance for ECL as at May 31, 2021, 2020 and 2019 to the opening loss allowance is presented in Note 9.

On the other hand, to calculate the ECL of rental receivables, these have been grouped based on shared credit risk characteristics and the days past due (age buckets). The rental receivables which relate to both third party and related party receivables have substantially the same risk characteristics. The Group has therefore concluded that the expected loss rates for all rental receivables, whether from third party or related party, are the same. The expected loss rates are based on the payment profiles of sales over a period of 36 months before May 31, 2021, 2020 and 2019, respectively, and the corresponding historical credit losses experienced within such period. The Group has identified the Philippine inflation rate to be the most relevant factor and has accordingly adjusted the historical loss rates based on expected changes in this factor. There are no past due rental receivables for the years ended May 31, 2021, 2020 and 2019.

On that basis, there is no additional loss allowance recognized based on management's assessment as of March 31, 2021, 2020 and 2019, as the expected credit losses are assessed to be insignificant to the Group's consolidated financial statements.

c. *Debt Instruments Classified as Financial Assets at FVOCI and Amortized Cost*

Debt securities measured at amortized cost and at FVOCI are considered to have low credit risk, and therefore, the loss allowance during the period is determined to be equivalent to 12 months ECL. Management considers "low credit risk" for listed bonds to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk when they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

The loss allowance are as follows:

<u>Company Internal Credit Rating</u>	<u>External Credit Rating</u>	<u>ECL Rate</u>		<u>Estimated Gross Carrying Amount at Default</u>	<u>Allowance</u>

In 2021 and 2020, the Group did not recognize additional or reversal of ECL for debt securities at amortized cost and debt securities at FVOCI.

d. *Refundable Deposits*

Management has assessed that these financial assets have low probability of default since these relate to continuing lease contracts and any outstanding deposit balance can be applied against future monthly rentals. Also, these are no longer discounted since management believes that the effect of discounting is not material to the consolidated financial statements.

4.3 Liquidity Risk

The Group manages liquidity risk by maintaining a balance between continuity of funding and flexibility. Treasury controls and procedures are in place to ensure that sufficient cash is maintained to cover daily operational and working capital requirements. Management closely monitors the Group's future and contingent obligations and ensures that future cash collections are sufficient to meet them in accordance with internal policies. The Group invests in cash placements when excess cash is obtained from operations.

As at May 31, 2021, 2020 and 2019, the Group's financial liabilities (excluding lease liabilities – see Note 13) have contractual maturities which are presented below.

Except for the financial assets and financial liabilities presented above, cash and cash equivalents, short-term investments, long-term investments, trade and other payables and refundable deposit, the Group has no other financial assets and/or financial liabilities that are carried at fair value or that are not carried at fair value but are required to be disclosed at fair value (see Note 6.3).

Management determined that the carrying amounts of the other financial instruments are equal to or approximate their fair values; hence, no further comparison between their carrying amounts and fair values is presented.

See Note 2.5 for a description of the accounting policies for each category of financial instruments. A description of the Group's risk management objectives and policies for financial instruments is provided in Note 4.

5.2 Offsetting of Financial Assets and Financial Liabilities

The Group's cash in bank, which is presented as part of the Cash and Cash Equivalents account, and portion of Short-term investments under the Other Current Assets – net account in the consolidated statements of financial position (see Notes 8 and 15) are subject to offsetting, enforceable master netting arrangements and similar agreements as at May 31, 2021, 2020 and 2019, such as loan agreements, as presented in the succeeding page.

For financial assets and financial liabilities subject to enforceable master netting agreements or similar arrangements above, each agreement between the Group and counterparties (i.e., depository bank) allows for net settlement of the relevant financial assets and financial liabilities (i.e., interest-bearing loans) when both elect to settle on a net basis.

All other financial assets and financial liabilities are settled on a gross basis; however, each party to the financial instrument (i.e., related parties) will have the option to settle all such amounts on a net basis through the approval by both parties' BOT or BOD. As such, the Group's outstanding receivables from and payables to the same related parties, if any, can potentially be offset to the extent of their corresponding outstanding balances.

6. FAIR VALUE MEASUREMENT AND DISCLOSURES

6.1 Fair Value Hierarchy

In accordance with PFRS 13, *Fair Value Measurement*, the fair value of financial assets and financial liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair value is disclosed in accordance with other relevant PFRS, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy is shown below.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurable date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and,
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

For investments which do not have quoted market price, the fair value is determined by using generally acceptable pricing models and valuation techniques or by reference to the current market of another instrument which is substantially the same after taking into account the related credit risk of counterparties, or is calculated based on the expected cash flows of the underlying net asset base of the instrument.

When the Group uses valuation technique, it maximizes the use of observable market data where it is available and relies as little as possible on entity specific estimates. If all significant inputs required to determine the fair value of an instrument are observable, the instrument is included in Level 2. Otherwise, it is included in Level 3.

6.2 Financial Instruments Measurement at Fair Value

The foregoing tables show the fair value hierarchy of the Group's classes of financial assets and financial liabilities measured at fair value in the consolidated statements of financial position on a recurring basis as of:

There were neither transfers between levels nor changes in levels of classification of instruments in all the years presented.

Following are the information about how the fair values of the Group's classes of financial assets and financial liabilities are determined.

a) Equity Securities

As of May 31, 2021, 2020 and 2019, instruments included in Level 1 comprise of listed common and preferred shares which are classified as and designated at financial assets at FVTPL and FVOCI, respectively. The corporate shares were valued based on their market prices quoted in the PSE at the end of each reporting period. On the other hand, the fair value of investments in UITF are classified as Level 2, since fair values are generally measured based on the net asset value of the Group's investment, computed and determined at the end of each reporting period based on the closing market and trade prices of the securities comprising the fund's portfolio. This valuation approach takes into the account the period end performance of the funds including all trades made within the funds and the related income and expenses arising therefrom.

b) Golf Club Shares

The Group's golf club shares are included in Level 2 as their prices are not derived from market considered as active due to lack of trading activities among market participants at the end or close to the end of the reporting period.

c) Debt Securities

The fair value of the Group's debt securities which consist of government and corporate bonds is estimated by reference to quoted bid price in active market at the end of the reporting period and is categorized within Level 1.

- (i)* Fair values of government securities issued by the Philippine government, are determined based on the reference price per Bloomberg which used BVAL. These BVAL reference rates are computed based on the weighted price derived using an approach based on a combined sequence of proprietary BVAL algorithms of direct observations or observed comparable.

- (ii) For corporate and other quoted debt securities, fair value is determined to be the current mid-price, which is computed as the average of ask and bid prices as appearing on the Corporate Securities Board Summary.

d) *Derivatives*

Derivatives classified as financial liability at FVTPL are included in Level 2 as their prices are not derived from market considered as active due to lack of trading activities among market participants at the end or close to the end of the reporting period. The fair value of derivative financial instruments that are not quoted in an active market is determined through valuation techniques normally using the discounted cash flow.

Valuation techniques are used to determine fair values, which are validated and periodically reviewed. To the extent practicable, models use observable data, however, areas such as credit risk (both own and counterparty), volatilities require management to make estimates. Changes in assumptions and correlations affect reported fair value of financial instruments.

6.3 *Financial Instruments Measured at Amortized Cost for which Fair Value is Disclosed*

As of May 31, 2021, 2020 and 2019, the fair value of debt securities categorized as Investment Securities at Amortized Cost amounted to P590.7 million, P535.7 million and P788.0 million, respectively, which is Level 1 in the hierarchy of fair values (see Note 5.1).

On the other hand, the fair value of the Group's interest-bearing loans amounted to P2,299.9 million, P2,555.9 million and P2,326.2 million as of May 31, 2021, 2020 and 2019, respectively. For interest-bearing loans with more than one year of maturity, its estimated fair value represents the discounted amount of the future cash flows expected to be paid which are discounted at current market rates. The fair values of the Group's interest-bearing loans are classified under Level 3 of the fair value hierarchy.

Other than the investment securities at amortized cost and interest-bearing loans, management determined that due to the short-term duration of the other financial assets and financial liabilities measured at amortized costs of the Group, as described in Note 2.5, their fair values as at May 31, 2021, 2020 and 2019 equal or approximate their carrying amounts. Accordingly, the Group did not anymore present a comparison of their fair values with their carrying amounts and correspondingly, their level in the fair value hierarchy. Nevertheless, if presented in the hierarchy, only cash and cash equivalents and short-term investments would fall under Level 1 and the rest would be under Level 3.

6.4 Fair Value Measurement for Non-financial Assets

(a) Determining Fair Value of Investment Properties

As of May 31, 2021, 2020 and 2019, the total estimated fair value of the Group's parcels of land and building and improvements classified as investment property are categorized as Level 3 in the fair value hierarchy (see Note 14.2).

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Building and improvements	P 189,530,407	P 189,530,407	P 151,549,095
Land	<u>103,932,373</u>	<u>44,498,295</u>	<u>53,572,000</u>
	<u>P 293,462,780</u>	<u>P 234,028,702</u>	<u>P 205,121,095</u>

The fair value of the Group's investment properties, except for certain investment properties owned by FRC which were determined using the discounted cash flows technique since information on appraisal reports is not readily available, are determined on the basis of the appraisals performed by an independent appraiser with appropriate qualifications and recent experience in the valuation of similar properties in the relevant locations. To some extent, the valuation process was conducted by the appraiser in discussion with the Group's management with respect to the determination of inputs such as the size, age, and condition of the land and buildings, and the comparable prices in the corresponding property location.

In estimating the fair value of these properties, management takes into account the market participant's ability to generate economic benefits by using the assets in their highest and best use. Based on management's assessment, the best use of the Group's non-financial assets indicated above is their current use.

The fair values of these non-financial assets were determined based on the following approaches:

(i) Fair Value Measurement for Land

The Level 3 fair value of land was derived using the market comparable approach that reflects the recent transaction prices for similar properties in nearby locations. Under this approach, the observable recent prices of the reference properties were adjusted for differences in key attributes such as property size, zoning, and accessibility. The most significant input into this valuation approach is the price per square foot, hence, the higher the price per square foot, the higher the fair value.

(ii) *Fair Value Measurement for Building and Improvements*

The Level 3 fair value of the buildings and improvements included under the Investment Properties account was determined using the cost approach that reflects the cost to a market participant to construct an asset of comparable usage, construction standards, design and layout, adjusted for obsolescence. The more significant inputs used in the valuation include direct and indirect costs of construction such as but not limited to, labor and contractor's profit, materials and equipment, surveying and permit costs, electricity and utility costs, architectural and engineering fees, insurance and legal fees. These inputs were derived from various suppliers and contractor's quotes, price catalogues, and construction price indices. Under this approach, higher estimated costs used in the valuation will result in higher fair value of the properties.

There has been no change to the valuation techniques used by the Group during the year for its non-financial assets. Also, there were no transfers into or out of the different levels of the fair value hierarchy as of May 31, 2021, 2020 and 2019.

The carrying amount of investment properties included in Level 3 is presented in Note 14.

(b) *Other Fair Value Information*

There were no transfers into or out of Level 3 fair value hierarchy during the years ended May 31, 2021, 2020 and 2019.

7. SEGMENT INFORMATION

7.1 Geographic Segments

In identifying its operating segments, management generally follow the Group's two major geographical areas, namely Metro Manila and provincial. These are the basis of the Group in reporting to its strategic steering committee for its strategic decision-making activities.

7.2 Segment Assets and Liabilities

Segment assets include all operating assets used by a segment and consist primarily of operating cash and cash equivalents, trade and other receivables, financial assets at FVTPL and FVOCI, investment securities at amortized cost, real estate held-for-sale, investment properties, and property and equipment.

Segment assets do not include deferred tax assets and other assets which are not allocated to any segment's assets.

Segment liabilities include all operating liabilities as presented in the consolidated statements of financial position, except for deferred tax liabilities.

7.3 Intersegment Transactions

Segment revenues, expenses and performance include revenues and purchases between geographical segments. Such services and purchases are eliminated in consolidation.

7.4 Analysis of Segment Information

The Group's geographical segment, which is based from location of all the Group's school campuses, for the years ended May 31, 2021, 2020 and 2019 follows (in thousands).

8. CASH AND CASH EQUIVALENTS

Cash and cash equivalents include the following components:

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Cash on hand and in banks	P 1,006,820,540	P 748,186,077	P 549,674,206

	<u>P 1,191,146,185</u>	<u>P 1,798,366,234</u>	<u>P 1,520,192,490</u>

Cash in banks generally earn interest based on daily bank deposit rates. Short-term placements are made for varying periods of up to three months depending on the immediate cash requirements of the Group.

These placements earn effective annual interest as follows:

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Peso placements	0.1% to 2.6%	1.5% to 6.5%	0.8% to 6.0%

Interest income earned from cash and cash equivalents are presented as part of Finance Income in the consolidated statements of profit or loss (see Note 20.1). The related interest receivable from placements as of May 31, 2021, 2020 and 2019 is presented as part of Accrued interest under the Trade and Other Receivables account in the consolidated statements of financial position (see Note 9).

All of the Group's receivables, which are subject to credit risk exposure [see Note 4.2(b)] have been reviewed for impairment. The Group applies the PFRS 9 simplified approach in measuring expected credit losses taking into consideration the expected loss rates determined through the assessment of credit impairment, which was observed for student receivables that are outstanding for at least two semesters/terms and are unenrolled in the previous term.

During the years ended May 31, 2021, 2020 and 2019, tuition and other school fees receivables were assessed for impairment and corresponding impairment losses were recognized as Impairment losses on receivables in the consolidated statements of profit or loss.

Miscellaneous receivables significantly pertain to due from brokers which pertains to the receivable by the Group's trust funds and other various receivables from non-related parties.

11. REAL ESTATE HELD-FOR-SALE

Real estate held-for-sale represents inventory of the Group's lots and townhouse units for sale located in Silang, Cavite and Ferndale Villas in Quezon City.

Management assessed that the carrying values of these assets are lower than their net realizable values considering present market values; hence, no impairment loss is recognized in fiscal years 2021, 2020 and 2019.

Construction in progress pertains to the costs incurred for the on-going construction of the school building of RCI in Rizal, and various on-going building additions and improvements of EACCI in Manila, FECSI in Cavite and the University in Manila.

In 2021, 2020 and 2019, RCI capitalized borrowing costs amounting to P6.8 million, P17.0 million and P4.7 million, respectively, representing the actual borrowing costs incurred on loans obtained to fund the construction project with capitalization rate of 1.92% to 4.70% (see Note 20.2).

In 2019, borrowing costs amounting to P33.7 million were capitalized, using the capitalization rate of 6.60%, incurred on loans obtained by the University to fund the construction of a new building in Lerma Street (see Note 20.2).

As of May 31, 2021, 2020 and 2019, certain fully depreciated assets with acquisition cost of P1,475.4 million, P810.2 million and P723.8 million, respectively, are still being used in the Group's operations.

In 2020, the Group recognized gain on disposal of miscellaneous equipment amounting to P2.1 million and is shown as Other Income – net account in the 2020 consolidated statement of profit or loss. No similar transaction for the years ended May 31, 2021 and 2019.

As at May 31, 2021, 2020 and 2019, none of the Group's property and equipment are used as collateral for any of the Group's interest-bearing loans and borrowings.

The table below describes the nature of the Group's leasing activities by type of right-of-use asset recognized in the consolidated statements of financial position.

	<u>Number of right-of-use assets leased</u>	<u>Range of remaining term</u>	<u>Average remaining lease term</u>	<u>Number of leases with extension options</u>	<u>Number of leases with termination options</u>
2021					
Building and lot	2	3-4 years	3.5 years	2	2
2020					
Building and lot	2	4 years	4 years	2	2

As at May 31, 2021 and 2020, none of the Group's right-of-use assets are used as collateral for any of the Group's interest-bearing loans and borrowings.

The amount of depreciation on right-of-use assets is presented as part of Depreciation and amortization presented under Other Operating Expenses account (see Note 19).

13. LEASES

The Group has leases for certain university buildings, transportation equipment, and event venues. With the exception of leases of low-value underlying assets, Right-of-use Assets and current portion of lease liabilities are presented under Property and Equipment and Trade and Other Payables, respectively (see Notes 12 and 16). Non-current portion of lease liabilities, on the other hand, has been presented separately in the 2021 and 2020 consolidated statements of financial position.

Each lease generally imposes a restriction that, unless there is a contractual right for the Group to sublet the asset to another party, the right-of-use asset can only be used by the Group. Leases are either non-cancellable or may only be cancelled by incurring a substantive termination fee. Some leases contain an extension of the lease for a further term. The Group is prohibited from selling or pledging the underlying leased assets as security. For leases over offices, the Group must keep those properties in a good state of repair and return the properties in good condition at the end of the lease. Further, the Group must insure the leased assets and incur maintenance fees on such items in accordance with the lease contracts.

13.1 Lease Liabilities

Current portion of lease liabilities are presented in the consolidated statements of financial position as part of Trade and other payables (see Note 16). On the other hand, the non-current portion is presented separately in the consolidated statements of financial position as of May 31, 2021 and 2020. The use of extension and termination options gives the Group added flexibility in the event it has identified more suitable premises in terms of cost and/or location or determined that it is advantageous to remain in a location beyond the original lease term. An option is only exercised when consistent with the Group's regional markets strategy and the economic benefits of exercising the option exceeds the expected overall cost.

Lease liabilities are presented in the consolidated statements of financial position as at May 31, 2021 and 2020 as follows:

	<u>2021</u>	<u>2020</u>
Current	P 9,998,745	P 12,065,118

	<u>P 34,510,986</u>	<u>P 46,572,571</u>

The lease liabilities are secured by the related underlying assets. The undiscounted maturity analysis of lease liabilities at May 31, 2021 and 2020 is as follows:

	<u>Within 1 year</u>	<u>1 to 2 years</u>	<u>2 to 3 years</u>	<u>3 to 4 years</u>	<u>Total</u>

13.2 Lease Payments Not Recognized as Liabilities

The Group has elected not to recognize a lease liability for leases of low-value assets and short-term leases. Payments made under such leases are expensed on a straight-line basis. The expenses relating to leases of low-value assets and short term leases amounted to P1.2 million and P14.4 million and is presented as Rental under Operating Expenses in the May 31, 2021 and 2020 consolidated statements of profit or loss (see Note 19).

At May 31, 2020, the total future cash outflows for lease of low-value assets amounted P59,000 (nil in 2021).

13.3 Additional Profit or Loss and Cash Flow Information

The total cash outflow in respect of leases amounted to P14.8 million and P2.8 million in 2021 and 2020, respectively. Interest expense in relation to lease liabilities amounted to P2.8 million and P1.2 million and is presented as part of Interest expense under Finance Costs in the 2021 and 2020 consolidated statements of profit or loss (see Note 20.2).

In 2020, the Group recognized gain on disposal of building and improvements amounting to P38.0 million and is shown as part of Other Operating Income in the 2020 statements of profit or loss. No similar transaction for the years ended May 31, 2021 and 2019.

14.1 Related Income and Direct Expenses

The total rental income earned by the Group from its investment properties amounting to P10.4 million, P33.4 million and P43.8 million for the periods ended May 31, 2021, 2020 and 2019, respectively, are presented as Rentals in the revenues section of the consolidated statements of profit or loss. The direct operating expenses, which include depreciation and amortization, insurance, and real property taxes incurred by the Group relating to investment properties, are presented as part of Depreciation and amortization, Property insurance, and Taxes and licenses, under Operating Expenses in the consolidated statements of profit or loss (see Note 19).

14.2 Fair Values of Investment Properties

Based on the latest appraisal report of an independent appraiser, the total fair value of investment properties amounted to P293.5 million, P234.0 million and P205.1 million as of May 31, 2021, 2020 and 2019, respectively. Information about the fair value measurement and disclosures related to investment properties are presented in Note 6.4.

Short-term investments, which consist of special savings deposits, investment in special deposit accounts and time deposits, earn interest ranging from 0.38% to 0.50%, from 0.88% to 2.50% and from 0.80% to 2.50% for the years ended May 31, 2021, 2020 and 2019, respectively (see Note 20.1). These investments are maturing beyond three months but within one year from the end of each reporting period. Related accrued interest is presented as part of the Trade and other Receivables account in the consolidated statements of financial position (see Note 9).

Inventories consist of merchandise inventory items relating to the University's bookstore.

Advances to suppliers pertain to advances made by FECSI, EACCI, FEUAI and FEU High to its suppliers for the various projects, which will be applied as payment for progress billings of the contractors and suppliers within 12 months from the end of the reporting periods. Advances to developers represent the amount paid for FRC's condominium units purchased at pre-selling stage that are not yet ready for occupancy or fully constructed at the end of the reporting periods.

Long-term investments includes investments in redeemable preference shares and time deposits that earn effective interest rates ranging from 6.13% to 6.63% for the years ended May 31, 2021 and 2020, and are maturing beyond one year from the date of placement as of the end of each reporting period.

Additional allowance for impairment on input VAT and long-term investments amounting to P23.8 million and P3.7 million, respectively, were recognized by the Group in 2021 (see Note 19).

Accrued expenses include the Group's accrual for salaries, professional's fees, interest, utilities, rentals and directors' bonuses, among others.

Deposits payable are amounts held by the Group on behalf of students and third parties for various specific activities. During the year ended May 31, 2020, certain deposits payable recognized in prior years amounting to P57.3 million, were recognized as income because the purpose for which the amounts were held have already been fulfilled. The related gains are presented as part of Other Income – net account in the 2020 consolidated statement of profit or loss. No similar transactions occurred during the year ended May 31, 2021 and 2019.

As of May 31, 2021, 2020 and 2019, retention payable includes portion of the consideration given for the acquisition of RCI which is retained by the University to ensure compliance by the selling shareholders of RCI to certain terms of the share purchase agreement. This amounts to P22.9 million as of May 31, 2021 and P42.2 million as of May 31, 2020 and 2019 and is currently maintained in an escrow account with a local bank. On the other hand, the remaining portion of retention payable pertains to the amounts owed to the Group's contractors of its ongoing construction projects (see Note 12).

Amounts due to students represent excess payment of tuition and miscellaneous fees that are refundable to them.

The NSTP trust funds collected from students amounted to P19.5 million, P27.1 million and P28.3 million for the years ended May 31, 2021, 2020 and 2019, respectively. As of May 31, 2021, 2020 and 2019, the remaining balance is set aside as a contingency fund and is presented as part of NSTP and other funds.

All of the Group's interest-bearing loans and borrowings are clean loans; no assets used and/or required as collaterals as of May 31, 2021, 2020 and 2019.

The total interest incurred by the Group on all of these loans, which are already exclusive of the capitalized borrowing costs on the property and equipment of the Group, are presented as part of Interest expense under Finance Costs in the consolidated statements of profit or loss (see Notes 12 and 20.2), while any outstanding interest payable is recognized as part of Accrued expenses under the Trade and Other Payables account in the consolidated statements of financial position (see Note 16).

Loans obtain with a local commercial bank are subject to loan covenants effective for the years ended May 31, 2021, 2020 and 2019, respectively, which require the Group to maintain a debt service coverage ratio of at least 1.2x and debt-to-equity ratio of not more than 2:1. As of May 31, 2021, 2020 and 2019, the Group has complied with its loan covenants.

18. EDUCATIONAL REVENUES

18.1 Core Revenue Stream

The Group derives revenues from transactions involving tuition fees, other school fees and other school-related activities such as sale of school merchandise and books. Revenues from tuition fees are recognized over time. All other revenue sources, such as other school fees and sale of school merchandise and books (presented as part of Other Income – net account in the consolidated statements of profit or loss), are recognized at a point in time.

The Group presents below the disaggregation of its revenue based on school units for the years ended May 31, 2021, 2020 and 2019. The Group recognizes revenues over time in the following education levels:

18.2 Unearned Tuition Fees

For the years ended May 31, 2021, 2020 and 2019, the Group, except FRC, has collected advance tuition fee payments from students who enrolled for the next school term which amounted to P33.7 million, P94.7 million and P258.4 million, respectively. These collections are presented as Deferred Revenues in the consolidated statements of financial position. These will be recognized as revenue once the performance obligation of the schools within the Group has been rendered.

18.3 Tuition Fee Rebates

The implementation of the government measures in response to COVID-19 caused the temporary shutdown of Group's operations from March until May 2020, together with the adoption of a skeleton workforce for designated employees with necessary and urgent functions.

The remaining second semester of school year 2019-2020 was continued via full online learning platform, the strategic implementation of Canvas since three school years ago, made the Group's quick transition to full online mode easier. However, with the shift of the learning platform, the Group found it necessary to return unutilized miscellaneous fees through a rebate to the students totaling P115.9 million as of May 31, 2020.

For school year 2020-2021, the Group adopted full online classes for the continuation of learning of students as the quarantine restrictions ensues. Unlike in the preceding year there was no rebate provided as outright reduction or discounted rate were applied upon enrolment of student.

In 2021, 2020 and 2019, an interest expense amounting to P6.8 million, P17.0 million and P38.4 million, respectively, have been capitalized as part of construction in progress under property and equipment account, which arose solely from specific borrowings (see Note 12).

Other finance cost pertains to bank service charges for maintaining tuition collection facilities with depository banks, services provided by investment trust managers, wire transfer transactions, foreign currency payment transactions to suppliers, among others.

21. EMPLOYEES' HEALTH, WELFARE AND RETIREMENT FUND

(a) Characteristics of the Defined Contribution and Defined Benefit Plans

(i) The University, FECSI and EACCI

The University, FECSI and EACCI maintain tax-qualified, funded and contributory retirement plans, which fall under a defined contribution type of retirement plan, covering regular teaching and non-teaching personnel members. The University, FECSI and EACCI's retirement plans were maintained since 1967, 2013 and 2017, respectively.

The respective retirement funds are under the administration of organizations, the FEU Health, Welfare and Retirement Fund, the FEU Cavite Health, Welfare and Retirement and Private Education Retirement Annuity Association (the Funds), through their respective Board of Governors.

Contributions to these funds are in accordance with the defined contribution established by the Retirement Board, which is the sum of the employees' and the University, FECSI and EACCI's contributions.

As a policy, any contributions made by the University, FECSI and EACCI in the past years that were subsequently forfeited resulting from resignations of covered employees prior to vesting of their retirement pay can be applied to reduce employer contributions in the succeeding years.

(ii) RCI, FRC, FEUAI and FEU High

RCI, FRC, FEUAI and FEU High have not yet established a formal post-employment plan. However, they accrue the estimated cost of post-employment benefits, actuarially determined, required by the provisions of RA No. 7641. These companies have discretion when to fund the minimum post-employment benefits calculated, however upon retirement of qualified employees, funds must be readily available for payment of employees' retirement benefits.

Retirement expense presented as part of Employee benefits under Other Operating Expenses in the consolidated statements of profit or loss amounted to P56.5 million, million, P71.6 million and P82.0 million for the years ended May 31, 2021, 2020 and 2019, respectively (see Note 19).

(b) *Explanation of Amounts Disclosed in the Consolidated Financial Statements*

Actuarial valuations are obtained: (i) to determine the higher of the defined benefit obligation relating to the minimum guarantee and the obligation arising from the defined contribution plan (for FEU, FECSI and EACCI); and, (ii) to update the retirement benefit costs for the others. All amounts presented below are based on the actuarial valuation reports obtained from an independent actuary for the years ended May 31, 2021, 2020 and 2019 (for FEU, FECSI and RCI) and June 30, 2021, 2020 and 2019 (for EACCI).

The post-employment benefit obligation amounting to P47.0 million, P61.9 million and P47.3 million as of May 31, 2021, 2020 and 2019, respectively, pertains to RCI, EACCI and FRC's defined benefit liability, which is presented under non-current liabilities in the consolidated statements of financial position.

The movements in the present value of the post-employment benefit obligation recognized in the books are as follows:

	<u>2021</u>	<u>2020</u>	<u>2019</u>

	<u>P 4,629,577</u>	<u>(P 8,463,371)</u>	<u>(P 8,557,937)</u>

In determining the amounts of post-employment obligation in accordance with PAS 19 (Revised), the following significant actuarial assumptions were used:

	<u>2021</u>	<u>2020</u>	<u>2019</u>
<u>FEU, FECSI and EACCI</u>			
Discount rates	4.46% - 4.94%	3.39% - 5.06%	5.63% - 7.27%
Salary growth rate	2.00% - 3.00%	3.00% - 5.00%	2.00% - 3.50%
<u>RCI</u>			
Discount rates	4.78%	3.87%	5.71%
Salary growth rate	5.00%	5.00%	5.00%

Assumptions regarding future mortality experience are based on published statistics and mortality tables. The average remaining working lives of an individual retiring at the following ages are as follows:

FEU (at age 60)	-	14 years both for males and females
FECSI (at age 60)	-	21 years both for males and females
EACCI (at age 60)	-	38 years both for males and females
RCI (at age 60)	-	14 years for males and 18 years for females

These assumptions were developed by management with the assistance of an independent actuary. Discount factor is determined close to the end of the reporting period by reference to the interest rates of a zero-coupon government bond with terms to maturity approximating to the terms of the post-employment obligation. Other assumptions are based on current actuarial benchmarks and management's historical experience.

As discussed in Note 2.15, the defined contribution plans of FEU, FECSI and EACCI are also accounted for as a defined benefit plan with minimum guarantee starting in 2014 upon the University's adoption of the PIC Interpretation on PAS 19 (Revised). However, considering that the present value of the obligation as determined by an independent actuary approximates the fair value of the plan assets, management opted not to recognize further the overfunding of the obligation for the years ended May 31, 2021, 2020 and 2019, in consideration of the Group's constructive obligation to pay a fixed amount of contribution to the fund.

An analysis of the defined benefit obligation of FEU, FECSI and EACCI following PIC Interpretation with respect to the defined benefit minimum guarantee under RA No. 7641 is presented below.

	<u>2021</u>	<u>2020</u>	<u>2019</u>

(c) *Risks Associated with the Retirement Plan*

The plan exposes the University, FECSI, RCI, and EACCI to actuarial risks such as investment risk, interest rate risk, longevity risk and salary risk.

(i) *Investment and Interest Risks*

The present value of the defined benefit obligation is calculated using a discount rate determined by reference to market yields of government bonds. Generally, a decrease in the interest rate of a reference government bonds will increase the plan obligation. However, this will be partially offset by an increase in the return on the plan's investments in debt securities and if the return on plan asset falls below this rate, it will create a deficit in the plan. Currently, the plan has relatively balanced investment in cash and cash equivalents, equity securities and debt securities. Due to the long-term nature of the plan obligation, a level of continuing equity investments is an appropriate element of the Group's long-term strategy to manage the plan efficiently.

Currently, the University's plan is significantly composed of equity securities and debt securities. Due to the long-term nature of the plan obligation, a level of continuing equity investments is an appropriate element of the University's long-term strategy to manage the plans efficiently. FECSI, on the other hand, has investments in cash and cash equivalents and loans.

(ii) *Longevity and Salary Risks*

The present value of the defined benefit obligation is calculated by reference to the best estimate of the mortality of the plan participants both during and after their employment, and to their future salaries. Consequently, increases in the life expectancy and salary of the plan participants will result in an increase in the plan obligation.

(d) *Other Information*

The information on the sensitivity analysis for certain significant actuarial assumptions, the asset-liability matching strategy of the University, FECSI and EACCI, and the timing and uncertainty of future cash flows related to the retirement plan are described below and in the succeeding pages.

The sensitivity analysis shown above is based on a change in an assumption while holding all other assumptions constant. This analysis may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated. Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation recognized in the consolidated statements of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous years.

(ii) Asset-liability Matching Strategies

To efficiently manage the retirement plan, the University through its Retirement Board, ensures that the investment positions are managed in accordance with its asset-liability matching strategy to achieve that long-term investments are in line with the obligations under the retirement scheme. This strategy aims to match the plan assets to the retirement obligations by investing in long-term fixed interest securities (i.e., government or corporate bonds) with maturities that match the benefit payments as they fall due and in the appropriate currency. The University actively monitors how the duration and the expected yield of the investments are matching the expected cash outflows arising from the retirement obligations.

In view of this, investments are made in reasonably diversified portfolio, such that the failure of any single investment would not have a material impact on the overall level of assets.

There has been no change in the University's strategies to manage its risks from previous periods.

Currently, EACCI and FECSI have no specific matching strategy between the plan assets and the plan liabilities.

(iii) *Funding Arrangements and Expected Contributions*

While there is no minimum funding requirement in the country for defined benefit plans, the size of the fund, bearing that it is significantly under a defined contribution regime, is also sufficient to cover the vested benefits of the higher between the RA No. 7641 or the Group's retirement plan itself, when a significant number of employees are expected to retire in 13 to 20 years' time.

The University expect to make contribution of P74.8 million to its plan during the next reporting period; FECSI and EACCI does not expect to make contributions to their plans during the next reporting period; while, RCI's management is yet to determine when it shall establish a formal plan for its post-employment benefit obligation.

The maturity profile of RCI's undiscounted expected benefit payments from the plan as of May 31 is shown below.

22. INCOME TAXES

Under Philippine laws, the taxable income from operations related to school activities and passive investment income of proprietary educational institutions is subject to a tax of 10%. However, if 50% or more of the institution's total gross income is from unrelated business activities, the regular corporate income tax (RCIT) of 30% will apply to the entire taxable income instead of the 10% preferential rate. Except FRC, which is subject to RCIT, all schools within the group are qualified to avail of the 10% preferential rate given their revenue profiles. In addition, all registered schools are not covered by the minimum corporate income tax (MCIT) provision of the 1997 Tax Code.

In March 2021, RA No. 11534 or the Corporate Recovery and Tax Incentives for Enterprises Act (CREATE) has been passed into law which provides for a reduced tax rate of proprietary schools to 1% from the previous 10%, effective July 2021 until June 2023. On April 2021, however, the Bureau of Internal Revenue (BIR) issued Revenue Regulation (RR) No. 5 - 2021 excluding the private schools, which includes the University and its subsidiary-schools, from availing of the preferential tax and effectively increasing the tax rate to the 25% regular corporate income tax.

In July 2021, the BIR issued the RR No. 14-2021 suspending certain provisions of RR No. 5-2021 including the 25% tax rate on private schools. Subsequently, House Bill No. 9913, a bill that seek to amend the National Internal Revenue Code (NIRC) to define the tax rates of proprietary schools to continue to allow them to avail of the preferential tax rate of 10%, and eventually the tax rate of 1% as provided by the CREATE law, has been filed and approved by the House of Representatives. Accordingly, the University and the subsidiary schools used the preferential tax rates of 10% and 1% for the computation of its income tax for the fiscal year ended May 31, 2021.

Furthermore, FRC used the tax rates of 30% and 25% for the computation of RCIT for its fiscal year.

RCI's deferred tax expense amounting to P0.3 million and P0.3 million relates to the remeasurement of post-employment benefit plan during the years ended May 31, 2021 and 2020, (nil in 2019), respectively, and is recognized as a component of tax expense reported in the consolidated statement of comprehensive income.

The net deferred tax assets of the University are not allowed to be offset against net deferred tax liabilities of other subsidiaries, or vice versa, for purposes of consolidation.

Presented below are the details of NOLCO of FECSI, FEUAI, Edustria and RCI.

No deferred tax assets were recognized by certain subsidiaries since management of the respective subsidiaries believes that no sufficient taxable profit will be realized against which deferred tax assets can be applied within the prescriptive period.

RCI did not recognize the deferred tax assets pertaining to allowance for impairment of receivables amounting to P0.3 million and P2.5 million as at May 31, 2021 and 2020, respectively. Also, RCI did not recognize deferred tax assets on its NOLCO amounting to P0.1 million and P3.4 million as of May 31, 2021 and 2020, respectively. The management has yet to perceive whether the related tax benefit on NOLCO and allowance for impairment of receivables are realizable in the future.

In 2021, 2020 and 2019, the Group reviewed its receivables from related parties and were accordingly assessed for impairment. Except for those receivables provided with corresponding allowance, no impairment loss was necessary to be recognized for all other receivables in all years presented.

23.1 Subscription of Preferred Shares of Stock

(a) EACCI

During the years ended May 31, 2020 and 2019, East Asia Educational Foundation, Inc. (EAEF) entered into a subscription agreement for the purchase of 100,000 and 112,500 preferred shares with total consideration of P100.0 million and P112.5 million, respectively. Outstanding receivable arising from the transaction amounting P40.0 million as of May 31, 2020 is presented as part of Other advances to related parties under Trade and Other Receivables account (see Note 9), has been fully paid in 2021.

(b) FEUA

During the year ended May 31, 2021 and 2020, EAEF, a related party under common management, entered into a subscription agreement for the purchase of 22,000 and 26,000 preferred shares of FEUA [see Note 24.5 (b)]. The total consideration paid by EAEF amounted to P22.0 million and P26.0 million for 2021 and 2020, respectively. There was no outstanding receivable arising from the transaction as the amount was fully paid by EAEF in the year of subscription.

23.2 Noninterest-bearing Advances

(a) Advances of the University to a Related Party

The University grants unsecured and noninterest-bearing advances, which are due and demandable to FEU Public Policy Foundation, Inc., related party under common management of the Group for working capital purposes.

Summarized below are the outstanding receivables from these advances as of May 31, 2021, 2020 and 2019 recorded as part of Other advances to related parties under Trade and Other Receivables account in the consolidated statements of financial position (see Note 9):

	<u>2021</u>		<u>2020</u>		<u>2019</u>
Balance at beginning of year	P 2,779,304	P	1,673,060	P	1,185,000
Additional advances during the year	<u>2,059,199</u>		<u>1,106,244</u>		<u>488,060</u>
Balance at end of year	<u>P 4,838,503</u>	P	<u>2,779,304</u>	P	<u>1,673,060</u>

As of May 31, 2021, management re-assessed that the entire amount of receivable is doubtful of collection, therefore, full allowance for impairment on these receivables were recognized. No allowance was provided in prior years.

(b) Advances between EACCI and EAEF

During the years ended May 31, 2021, 2020 and 2019, EACCI granted to EAEF cash advances for working capital requirements and other purposes. These advances are noninterest-bearing, unsecured and payable in cash upon demand. As of May 31, 2021, 2020 and 2019, outstanding advances to EAEF amounting to P29.1 million, P51.7 million and P34.1 million, respectively, are presented as part of Non-trade advances to related parties under the Trade and Other Receivables account in the consolidated statements of financial position (see Notes 9). No impairment loss is recognized by the Group on the receivables arising from advances.

(c) Advances between EACCI and NREF

During the years ended May 31, 2021, 2020 and 2019, certain tuition and other school fees have been collected by NREF for the account of EACCI. Conversely, there were also collections received by EACCI for the account of NREF. These collections and remittances came about due to incorrect ID numbers used by the students. Subsequently, these collections were appropriately transmitted to the entities to which the related receivables are due. The receivable and payable accounts are unsecured, noninterest-bearing and payable in cash immediately upon demand. Outstanding payables amounting to P15.9 million and P5.3 million as of May 31, 2020 and 2019, respectively, (nil in 2021) are presented as part of Other advances from related parties under the Trade and Other Payables account in the consolidated statements of financial position (see Note 16).

(d) Advances of RCI to its Related Party

RCI grants noninterest-bearing and unsecured advances to RCEE, Roosevelt College Scholarship Foundation and Roosevelt College Center for Teacher Education, related parties under common management, for working capital purposes. These advances are generally collectible in cash and are due upon demand or through offsetting arrangement. The outstanding balance from these transactions amounts to P3.6 million, P3.1 million and P2.3 million as of May 31, 2021, 2020 and 2019, respectively, are presented as part of Other advances to related parties under the Trade and Other Receivables account in the consolidated statements of financial position (see Note 9). In 2021 and 2020, RCI's management assessed that certain outstanding balances with the related parties were impaired; hence, impairment losses amounting to P0.2 million and P0.8 million, are recognized.

23.3 Reimbursement of Expenses

During the year ended May 31, 2021, 2020 and 2019, the University billed its related entities for the reimbursement of amounts it initially advanced to third party suppliers and service providers for certain expenses and various allocated expenses, at cost. These expenses pertain to those incurred in the normal course of operations of the University and its related entities, which include legal fees, various supplies, use of facilities, and salaries and benefits of seconded employees, among others.

23.4 Leases

(a) Lease of Certain Floors to EAEF

Outstanding receivables, arising from prior years' lease of certain floors by the University and EACCI to EAEF, amounted to P2.9 million as of May 31, 2020 and 2019 (nil in 2021), and is presented as part of Rental receivable under Trade and Other Receivables account in the consolidated statements of financial position (see Note 9).

(b) Lease of Buildings to Nicanor Reyes Educational Foundation (NREF)

FRC leased out certain buildings to NREF with new effectivity January 31, 2013 to December 31, 2023 for an annual rental fee of P1.2 million or 10% of NREF's annual gross income, whichever is higher.

In January 2020, the FRC entered into an amended lease agreement with EACCI to cover the lease of certain buildings within campus premises collectively referred to as FEU Diliman Campus. The amended lease term is from February 1, 2020 to January 31, 2021 for an annual rental fee of 10% of EACCI's annual gross income from tertiary and senior high school departments and 5% from basic education and junior high school department, but no lower than P25.0 million.

Total rental income of FRC from NREF amounted to P19.2 million and P20.0 million for the years ended May 31, 2020 and 2019 (nil in 2021), respectively, which is recorded as part of Rental under Revenues in the consolidated statements of profit or loss. Outstanding receivables from this transaction amount to P10.2 million and P7.7 million as of May 31, 2020 and 2019 (nil in 2021), respectively, are presented as part of Rental receivable under the Trade and Other Receivables account in the consolidated statements of financial position (see Note 9). No impairment loss is recognized by the Group on this receivable from NREF.

(c) Lease of Building from NREF

The University had lease agreement with NREF for its lease of facilities. The lease agreements are long-term and renewable.

Upon adoption of PFRS 16, the Group, as a lessee, recognized right-of-use asset and lease liabilities as at June 1, 2019. Amortization of the right-of-use asset arising from these transactions amounting to P2.8 million is presented as part of Depreciation and amortization under Cost and Operating Expenses in the 2021 and 2020 consolidated statements of profit or loss. Total interest expense on lease liabilities amounting to P0.4 million and P0.6 million for the years ended May 31, 2021 and 2020, respectively, is presented as part of Interest expense on lease liabilities under Finance Costs in the consolidated statements of profit or loss. The outstanding balances arising from these transactions as at May 31, 2021 and 2020, are presented as part of right-of-use asset under Property and Equipment, and Lease Liabilities (current portion under Trade and Other Payable) in the consolidated statements of financial position.

Under PAS 17, total rental expense arising from the lease charged to operations amounting to P3.1 million for the year ended May 31, 2019, is presented as part of Rental under Operating Expenses in 2019 consolidated statement of profit or loss (see Note 19). Outstanding payable arising from the transaction amounting to P6.8 million as at May 31, 2019, is presented as part of Accrued expenses under the Trade and Other Payables account in the consolidated statements of financial position (see Note 16).

23.5 Retirement Funds

The University, FECSI and EACCI's retirement funds are in the form of trustee-banks managed accounts. The fair value of the Group's retirement plan assets amounted to P865.5 million in 2021, P892.6 million in 2020 and P757.0 million in 2019 [see Note 21(b)]. The University, FECSI and EACCI have no transactions with the retirement plans other than contributions and benefit payments in all periods presented.

None of the retirement plan assets are invested in or provided to the University, EACCI or FECSI, their related parties, and to their officers in the form of advances or loans.

The retirement funds neither provide any guarantee nor surety for any obligation of the University, EACCI and FECSI.

In January 2020, the FRC entered into an amended lease agreement with EACCI to cover the lease of certain buildings within campus premises collectively referred to as FEU Diliman Campus. The amended lease term is from February 1, 2020 to January 31, 2021 for an annual rental fee of 10% of EACCI's annual gross income from tertiary and senior high school departments and 5% from basic education and junior high school department, but no lower than P25.0 million

23.6 Key Management Personnel Compensation

Total remunerations of the Group's key management personnel for the years ended May 31, 2021, 2020 and 2019, which are presented as part of Employee benefits under Operating Expenses in the consolidated statements of profit or loss (see Note 21), are as follows:

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Short-term benefits	P 101,367,997	P 123,069,612	P 131,260,806

	<u>P 116,417,150</u>	<u>P 136,661,205</u>	<u>P 145,341,733</u>

23.7 Financial Guaranty for Subsidiaries' Loans

In March 2017 and January 2018, the BOT approved that for and in consideration of the loan or credit facilities obtained by any subsidiary of the University, in which the University owns at least 75% of the outstanding voting capital stock of such subsidiary, from a certain local commercial bank, the University gives its full consent and authority to act as surety up to P500 million for the subsidiary's obligations arising from any loan or availments from any credit facilities granted by the said local bank in favor of the subsidiary, as well as any renewals, increases, extensions of existing obligations obtained by or which may hereafter be obtained by the subsidiary from the local bank, whether direct or indirect, principal or secondary. As of May 31, 2021, 2020 and 2019, RCI has availed a loan amounting to P500.0 million, P400.0 million and P150.0 million, respectively, from the said local bank (see Note 17).

23.8 Others

In July 2014, the FRC's declaration of stock dividend resulted in 291 fractional shares amounting to P0.3 million, which the FRC also opted to treat as treasury shares.

On October 8, 2019, the FRC's BOD approved the proposal to increase its par value from P1,000 to P10,000, resulting to fractional shares for stockholders owning less than ten shares. Outstanding liability amounting to P27.1 million and P28.5 million as of May 31, 2021 and 2020, (nil in 2019), respectively, are presented as part of Due to related parties under Trade and Other Payables account in the consolidated statements of financial position (see Note 16).

24. EQUITY

24.1 Capital Stock

The University's capital stock consists of common shares with details below.

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Authorized number of shares – P100 par value per share	50,000,000	50,000,000	20,000,000
Total shares issued	24,093,094	16,514,354	16,514,354

On September 10, 2019 the BOT approved the increase of the University's authorized capital stock. The same was ratified by the stockholders on October 19, 2019, and approved by the SEC on March 19, 2020.

In line with the increase in authorized capital stock of the University, the BOT also declared, which was subsequently ratified by the shareholders, 46% stock dividends amounting to P755.4 million. The approval for the issuance of such dividend shares was granted by the SEC on June 2, 2020, with distribution date set on June 18, 2020 (see Note 24.2). As of May 31, 2020, pending the approval from the SEC, the value of the stock dividends has been recognized and presented as Stock Dividends Distributable in the 2020 consolidated statement of financial position.

Below is the ownership structure of the University's outstanding shares as of May 31, 2021, 2020 and 2019.

	<u>2021</u>	<u>2020</u>	<u>2019</u>

**Net of those held in Treasury (see Note 24.2)*

As of May 31, 2021, 2020 and 2019, the public owns 33.43%, 33.99% and 34.32%, respectively, of the University's listed shares.

As of May 31, 2021, there are 1,509 holders of the listed common shares owning at least one share.

All shares of the University are listed on the PSE, there had been no follow-on listing since the initial listing in 1986 at an offer price of P100. The closing price of the University's listed shares was P570, P830 and P890 per share as of May 31, 2021, 2020 and 2019, respectively.

24.2 Treasury Stock

This account includes the University's common shares held and acquired by FRC in various dates during the respective reporting periods. The changes in market values of these shares, recognized as fair value gains or losses by FRC, were reclassified to treasury stocks, as presented in the consolidated statements of changes in equity. As of May 31, 2021, 2020 and 2019, it consists of 117,146, 91,999 and 88,998 shares, respectively.

A portion of the University's retained earnings is restricted from dividend declaration up to the cost of treasury stocks, excluding the amount acquired and held by FRC as this is considered as a cross-holding as of the end of the reporting period.

Unclaimed checks related to dividends declared as of May 31, 2021, 2020 and 2019 are presented as Dividends payable under the Trade and Other Payables account in the consolidated statements of financial position (see Note 18).

24.5 Subsidiaries with Material Non-controlling Interest

(a) FRC

The University holds 38.18%, 38.04% and 37.52% interest in FRC as of May 31, 2021, 2020 and 2019, respectively. Management considers that the University has de facto control over FRC even though it holds less than 50% of the voting shares of stock of FRC, because it is exposed or has right to variable returns through its power over FRC [see Notes 1.1 and 3.1(i)]. The accumulated NCI of FRC amounted to P785.5 million, P801.9 million and P814.7 million as of May 31, 2021, 2021 and 2019, respectively.

A summary of financial information of FRC as of and for the years ended May 31, 2021, 2020 and 2019 before intragroup eliminations are shown below.

	<u>2021</u>		<u>2020</u>		<u>2019</u>

	(P 1,893,920)	(P	20,886,883)	P	7,927,776

(b) EACCI and FEUAI

Prior to 2017, EACCI issued its newly authorized preferred shares to EAEF, a related party under common management. In 2020 and 2019, EACCI issued additional authorized preferred shares to NREF, a related party under common management (see Note 23.1). Total cost of preferred shares issued and outstanding amounts to P1.2 billion as of May 31, 2021 and 2020 and P1.1 billion as of May 31, 2019.

In 2021, 2020 and 2019, FEUAI also issued its newly authorized preferred shares to EAEF (see Note 23.1). Total cost of preferred shares issued and outstanding amounts to P750.0 million, P728.0 million and P702.0 million as of May 31, 2021, 2020 and 2019, respectively.

Both non-controlling interests in EACCI and FEUAI relate to non-voting shares.

EACCI and FEUAI's preferred shares have the following features:

- (a) Holders of the preferred stock have no pre-emptive right to subscribe to any or all issues or other disposition of shares of common stock or preferred stock of EACCI or FEUAI, including treasury stock, if any;
- (b) Subject to availability of retained earnings and sufficient cash as may be determined by EACCI's BOT or FEUAI's BOD, holders of the preferred stock are entitled to receive, out of unrestricted retained earnings of the EACCI or FEUAI, non-cumulative dividends at the rate of 3% per annum based on the issue value of each share, payable annually on such date as may be determined by the EACCI's BOT or FEUAI's BOD from time to time;
- (c) Preferred stock shall be non-voting (except in instances specifically provided by law) and non-participating as to the payment of dividends;

- (d) Preferred stock may be redeemed at the option of the issuer regardless of existence of unrestricted retained earnings at an issue price equal to the issue value and under terms and conditions as determined by the EACCI's BOT or FEUAI's BOD; and,
- (e) In the event of any voluntary or involuntary liquidation, dissolution, distribution of assets or winding up of EACCI or FEUAI's operations, the holders of preferred stock shall have preference and priority as to the net assets of EACCI or FEUAI or proceeds thereof over the holders of common stock.

During the years ended May 31, 2021, 2020 and 2019, the BOT of EACCI declared cash dividend to all of their stockholders. Accordingly, EAEF received P30.0 million, P27.5 million and P27.5 million from each of the said declarations in 2021, 2020 and 2019, respectively.

A summary of financial information of FEUAI and EACCI as of and for the years ended May 31, 2021, 2020 and 2019, before intragroup eliminations are shown below and in the succeeding page (in thousands).

As of May 31, 2021, the weighted average and actual number of outstanding shares is the same.

The University has no potential dilutive common shares as of May 31, 2021, 2020 and 2019; accordingly, the diluted EPS is the same as the basic EPS in all the years presented.

26. COMMITMENTS AND CONTINGENCIES

The following are the significant commitments and contingencies involving the Group:

26.1 Capital Commitments

As of May 31, 2021, 2020 and 2019, FRC has commitments of about P66.0 million, P84.1 million and P116.6 million, respectively, for the condominium units acquired at pre-selling stage that are currently under construction.

26.2 Operating Lease Commitments

(a) Group as Lessor

As discussed in Note 23.4(a), FRC lease out certain buildings to EAEF and NREF for varying periods. FRC also lease out certain land and buildings to several non-related parties for a period of one to ten years. FRC also receives customer and security deposits relevant to its leasing activities as a lessor which is recognized under Other Non-current Liabilities in consolidated statements of financial position.

Future minimum rental receivables, excluding contingent rental, under these operating leases are shown below.

	2021	2020	2019
Within one year	P 4,497,842	P 12,880,020	P 23,123,123
After one year but not more than five years	8,770,915	22,528,952	42,890,129
More than five years	-	808,245	7,568,490
	<u>P 13,268,757</u>	<u>P 36,217,216</u>	<u>P 73,581,742</u>

(b) Group as Lessee

The Group is a lessee under operating lease agreements covering rentals of event venues, transportation vehicles and small items of equipment used for various students' and employees' activities.

The future minimum rentals payable under these non-cancellable operating leases as of May 31, 2019 are as follows:

Within one year	P 3,135,996
After one year but not more than five years	<u>12,021,315</u>
	<u>P 15,157,311</u>

26.3 Other Provisions and Contingencies

As of May 31, 2021, the University and its subsidiaries has no record of any litigation not being contested or any that the University and its entities has accepted any liability in relation to labor cases and other civil cases.

Further, the previous tax case and its attendant omnibus motion filed by the University with the Court of Tax Appeals was withdrawn on March 15, 2021 to fully satisfy the requirements of the tax amnesty availed by the University in December 2019.

There are other contingencies that arise in the normal course of business that are not recognized in the Group's financial statements. Management believes that losses, if any, arising from these commitments and contingencies will not materially affect its financial statements, however, the University opted to appropriate portion of its retained earnings to cover for such contingencies.

The Group has entered into transactions which resulted to obligations that will probably result to an outflow of economic resources. Accordingly, the management has recognized the probable losses as Provisions in its consolidated statements of financial position. However, as allowed by relevant accounting standards, the Group did not disclose the nature and details of its provisions because it may prejudice the interest and position currently being taken by the Group.

27. CAPITAL MANAGEMENT OBJECTIVES, POLICIES AND PROCEDURES

The Group aims to provide returns on equity to shareholders while managing operational and strategic objectives. The Group manages its capital structure and makes adjustments to it, in the light of changes in economic conditions. To maintain or adjust capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders, issue new shares or obtain debt financing.

The Group defines capital as paid-in capital stock and retained earnings, both appropriated and unappropriated. Other components of equity such as treasury stock and revaluation reserves are excluded from capital for purposes of capital management. The BOT has overall responsibility for monitoring of capital in proportion to risks. Profiles for capital ratios are set in the light of changes in the Group's external environment and the risks underlying the Group's business, operation and industry.

The University monitors capital on the basis of debt-to-equity ratio, which is calculated as total liabilities excluding deferred revenues divided by total adjusted equity (comprised of capital stock, stock dividends distributable and retained earnings) attributable to owners of the parent company. Capital for the reporting periods under review is summarized below.

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Total adjusted liabilities	P 4,122,563,634	P 4,674,024,896	P 3,953,514,389
Total adjusted equity attributable to owners of the parent company	<u>8,437,566,218</u>	<u>7,663,420,984</u>	<u>7,371,033,466</u>
Debt-to-equity ratio	<u>0.49 : 1.00</u>	<u>0.61 : 1.00</u>	<u>0.54 : 1.00</u>

The Group's goal in capital management is to maintain a lower liability compared with its adjusted equity or debt-to-equity structure ratio of not more than 1.00 : 1.00. This is in line with the Group's bank covenants related to its borrowings, which requires the Group to maintain debt-to-equity ratio of not more than 2.00 : 1.00 and debt service coverage ratio of at least 1.2x.

The Group has complied with its covenant obligations, including maintaining the required debt-to-equity ratio and debt service coverage ratio for all the years presented

There was no significant change in the Group's approach to capital management during the year.

We have audited, in accordance with Philippine Standards on Auditing, the consolidated financial statements of Far Eastern University, Incorporated and subsidiaries (the Group) for the year ended May 31, 2021, on which we have rendered our report dated August 17, 2021. Our audit was made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The applicable supplementary information (see List of Supplementary Information) is presented for purposes of additional analysis in compliance with the requirements of the Revised Securities Regulation Code Rule 68, and is not a required part of the basic consolidated financial statements prepared in accordance with Philippine Financial Reporting Standards. Such supplementary information is the responsibility of the Group's management. The supplementary information has been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic consolidated financial statements taken as a whole.

We have audited, in accordance with Philippine Standards on Auditing, the consolidated financial statements of Far Eastern University, Incorporated and subsidiaries (the Group) for the years ended May 31, 2021, 2020 and 2019, on which we have rendered our report dated August 17, 2021. Our audit was made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Group's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purposes of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic consolidated financial statements prepared in accordance with PFRS. The components of these financial soundness indicators have been traced to the Group's consolidated financial statements as at May 31, 2021, 2020 and 2019 and for each of the three years in the period ended May 31, 2021 and no material exceptions were noted.
